## Earl of Egmont, Former Priddis, Alberta, Rancher Dies From Injuries

Southampton, Eng., May 16 —The Earl of Egmont, former rancher of Priddis, Alberta, died in hospital here today from injuries suffered in an automobile accident outside this city Wednesday evening. He was 59 years old.

For nearly three years the loneliness peer in England," as he has often been described, lived in his historic Avon Castle, Hampshire, with his only son and heir, Viscount Perceval, for company. He discharged all the servants of estate shortly after his arrival and father and son established themselves in the huge kitchen of the castle, doing their own housework and cooking their own meals. He succeeded to the title in 1929.

## Lindbergh Baby Kidnapped and Slain by Five Men and one Woman (says the New York Times)

New York —The New York Times says police have information the Lindbergh baby was kidnapped and slain by a gang of five men and one woman whose identification are believed to be known to New Jersey authorities. The arrest of one or more of them is expected within a few days.

On the basis of information furnished by Dr. John F. Condon, the "Jafsie" of the \$50,000 ransom payment, and by Morris Rosner, undercover intermediary, the paper says, state police have been able partially to identify the criminals and to reconstruct the first coherent picture of the crime.

The Times' story in effect is as follows: Charles A. Lindbergh, jr., was stolen from his crib on the night of March 1, by three men, one believed to be a German, another an Italian and the third a Brazilian. The leaders of the band, both Americans, remained in hiding in a shack in the Sourland Mountains, and the woman, also an American, was brought into the conspiracy to care for the child.

The kidnapers had no intention of doing away with the child at first, but resorted to murder when their plans began to go wrong. They forgot to bring adhesive tape to seal the baby's lips and with his unusually strong lungs his screams could be heard for some distance.

The three actual kidnapers travelled to the home of Colonel Lindbergh near Hopewell, N.J., in an automobile bearing New York license plates. The woman stayed in the car and the German and one confederate entered the house.

After carrying out their purpose the party have been believed to have lurked in the neighborhood for some time and probably witnessed squads of police scouring the countryside. It was at this point that the criminals became panic-stricken and are believed to have battered the child to death. Still they went ahead with the ransom negotiations. Several times police or in-

## Trustees Chinook Consolidated S.D. Hold Meeting

The Board of Trustees of Chinook S. D. met in the school on Wednesday evening, May 10th, at 8 p.m. All members present. Minutes of last meeting were read and adopted.

Then followed the reading of the correspondence, of applications for van driving, of bills for payment, and of appeals against assessment.

Hille—that the assessed value of the following lands, viz: S half 2-29-8w 4th, S.W. quarter 22-28-7 w 4th and E. half 27-29-7 w 4th remain as at present as such values are not out of proportion with the values of similar land in the district.

Rosenau—that assessed value of A. V. Brodine's car be reduced to \$100.

Hille—that assessed value of stock of the Acadia Produce Co., remain as at present, namely \$3500, and that the building on lot 9, block 1, be reduced from \$4,000 to \$3,800.

Rosenau—that the following accounts be paid: W. A. Hurley, balance on account, \$6.45; New Walker Mine, coal, \$71.25; E. E. Jacques, on account, \$12.55; L. Propdfoot, express, \$1.50; W.C.B., \$12; Cooley Bros., on acct, \$45.05; R. D. Vanhook, hauling coal from mine, \$80.85; L. S. Dawson, assessor, \$25.

That resolution 26 of April 13 be amended as follows—

Route 3—  
Reg. Witt, April 4-May 2; C. W. Rideout, May 3-May 15; Cooley Bros., May 19-May 27; Jas. Young, May 30-June 30.  
Route 6—J. Funk, April 4-May 13; Banner Hardware, May 16-May 31; Cooley Bros., June 1-June 15; H. Lloyd, June 17-June 30.  
Route 1—  
H. T. Lengraf, April 15 until further notice, and at last meeting until May 31.  
Route 2—K. Hohlen, May 16-June 30.  
Hille—that as soon as finances permit Golden Center M.D., in the opinion of this board, should consider doing a little work on the road south of sections 17 and 18 and west of sections 7 and 6 in tp. 29-6 as one of our school vans use this road continuously and has done so for the last sixteen years.

Johnston—that we now adjourn to meet again Monday, June 20, at 8 p.m.

LORNE PROUDFOOT,  
Secretary-Treasurer.

Smile and the world smiles with [you]

Kick and you kick alone;  
But the cheerful grin will let you [in]

Where the knocker is never known

Be sure and attend the "hard times" dance, Chinook hotel ballroom next Saturday evening.

intermediaries were on the verge of closing in on the actual kidnapers and the woman, but were persuaded to bide their time for fear of jeopardizing the life of the baby—already dead. They were known to "a number of underworld characters" who were out to "get" them if the police did not.

## MY MOTHER DEAR

[Air, Rose Marie]

The days have seemed like years  
My mother dear, my mother dear  
Since I last gazed at you thru tears  
My mother dear, my mother dear  
And when my lips you fondly

[pressed]  
A mother's kiss of all the best  
I love you more than all the rest,  
My mother dear, my mother dear.

There's not on earth a heart so true  
As mother dear, as mother dear,  
I vow my love is all for you

My mother dear, my mother dear,  
I knew not them how long 'twould [be]

And now life seems so dark to [me]  
My heart cries out with love to be  
With mother dear, with mother [dear].

—By Capt. C. O. Peters,  
Chinook, Alberta.

## Empire Day

With the approach of another Empire Day it may be interesting to learn that Empire Day was founded by Mrs. Clementina Fessenden, who was born at Ancaster, Ontario, and who died at an advanced age at Hamilton, on September 14, 1918.

The first Empire Day was celebrated in Canada in 1899.

3-roomed house, barn and lot. Cheap for cash. Short time offer only. A. E. Roberts, Chinook.

## Chinook and District Gets Good Report

When the assistant manager, W. J. McKee of the Credit Foncier Finance Corporation was a guest at the Chinook hotel on April 12 he was so favorably impressed with conditions here that he wrote for the general manager, G. E. Andrews, of Edmonton, to come to Chinook. Mr. Andrews arrived here on May 5 and from his personal observations resulted in that their inspector, T. A. McFarlane of the Alberta head office, Edmonton, arrived with his assistant, Mr. Vandersy, to give the field a general inspection for over a week. They reported conditions as ideal all over the district covered by them. They spoke in the highest praise of the courtesy, service and cleanliness of the Chinook hotel and stated that the citizens should be proud of such an up-to-date and well managed hostelry.

## Meeting of Officers and Directors Called

A meeting of the officers and directors of the Chinook and District School Fair has been called for by the president, Mr. N. F. Marcy, to be held in the Chinook school hall on Saturday evening, May 21, at 8 p.m.

It is urgently requested that a full attendance of officers and the directors appointed by the schools entered will attend this meeting.

Miss M. Otto, secretary.

"Fresh from the Gardens"

## The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing; wayfaring youth promising to reform have made such declarations; all of us have been exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is not only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten; they, too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragements and disappointments, weakening our wills, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by and in it.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our modes of thought and action, our institutions of government, our community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit, to learn, and to apply his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than the present.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of mankind today.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, whatever may have been the ultimately beneficial reforms which followed, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. This is but natural; it is, indeed, human nature. They are prepared to go to extremes in the present without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for men to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results which flowed from those experiences, with a view and a determination to profit thereby, rejecting what time and experience has proven to be bad, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness into the warp and woof of the future.

## A Really New Idea

Woman Eighty-Two, Has Plan To Salvage Old Age.

Dr. Lillian Jane Martin, consulting psychologist of San Francisco, who has spent more than half a century as an educator and will celebrate her eighty-second birthday in July, arrived at New York the other day fresh and active after driving her own car across the continent and lecturing in the large cities along the way. "I am here," she announced, "to present the whole matter of salvaging old age. For example, the weakness of being too slow: Many old people started life when the tempo of society was much slower than it is today. And so they must be speeded up to modern conditions. Both physical and mental exercises can be given them up to the speed of whatever industry they are in."

Small automobiles are becoming popular in British Malaya.

## Record For Gold Receipts

High Point Reached At Royal Canadian Mint During April

Reaching a new high point in the records at the Royal Canadian Mint, coincident with the record Canadian production as reported to the Dominion Bureau of Statistics the receipts of gold from Canadian mines in April amounted to 260,353 fine ounces valued at \$5,381,984.

The previous record was established in December last when the receipts were 245,556 fine ounces worth \$5,076,095.

As the receipts in March were 198,332 fine ounces valued at \$4,099,892, the gain in the month was pronounced.

A reel of sound film was recently used in Australia as evidence against a noisy factory in a court suit.

Scotland's saving clubs are growing.

## Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragoman, R.R. 2, Midland, Ont., writes:—"I had been troubled with heart trouble for many years. My heart wouldn't beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells."

I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. B. Milburn Co., Ltd., Toronto, Ont.

## A Promising Sign

Many New Manufacturing Industries Are Starting In Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufactures, of which Germany has been the principal originator in the past.

In all these varying fields, new industries have sprung up in the Old Country, and so far as dyes and alloys are concerned, the manufacture is now predominantly British, while silks and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-wows, surely this is a promising sign.

## Where Butter Is Dear

Russian Housewives Have To Pay \$3.40 Per Pound

Long queues of women are forming daily in Moscow again because of the serious shortage of butter, milk, eggs and sugar. After a year in which these lines of waiting housewives had been almost eliminated, they have been brought back to the doors of the so-called commercial stores by the thousands. The commercial stores are government-owned, but are distinct from the ordinary rationed government shops, from which dairy products have virtually disappeared. The commercial shops sell goods at much higher prices and without food books. Butter sells at about 7.50 rubles (approximately \$3.40) a pound and despite the price, there is usually a race to the shops as soon as news of receipt of new supplies is circulated.

## Acids In Stomach Cause Indigestion

Create Sourness, Gas and Pain. How To Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, flatulency, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food souring, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed.

Try lying down all digestive acids and indigestion get from any drug.

Blasphemed stomach and there is no sourness, gas or pain. Blasphemed Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach. It is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

## Wheat Export

Prospects Are Seen For A Better Export Movement In Near Future

Prospects of a better export movement of wheat, especially after July, when southern hemisphere wheat is exhausted, are forecast in the monthly report of the statistical department of the Board of Grain Commissioners on the movement of wheat in Canada crops in April. Freight rates have dropped to low levels on the Great Lakes with little business offering. There has been a noticeable demand for rye of late.

Miller's Worm Powders not only make the infantile stomach untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

## No Wood Is Solid

The solidest and soundest kind of wood is not really solid at all. It is full of air—twenty to forty per cent. of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

Paint spraying machines are just becoming popular in Bombay, India.

Ayr, Scotland, is to have public covered salt-water baths.

## LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for 8 months, and have reduced from 212 lbs. to 182 lbs. I have never felt in any way. Also I have never felt any ill effects from the salts. That is an instance of Kruschen Salts moderating diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning—you can lose fat in just the same way."

This is what Kruschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed—your blood is purified.

As a result, instead of planning yourself in an easy chair every free moment and letting fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

## New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing checks, they fish in public and private letter-boxes, using typewriter as bait. Much of this work must prove futile, unless they have inside information or work at au-pituous times, such as the first of the month.

Forgery of the purchased checks is a specialized job, which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristic that they offer to Scotland Yard a ready means of identifying their handiwork.

If Edgar Wallace were still alive, a new book or play featuring these novel exploits might be expected in a few weeks—or even days.

## Radio In Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgic," which is rapidly nearing completion at Belfast. The aerial and direction finder both will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin inside, it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "Georgic" will have two huge elliptical funnels, but as she is a motor vessel, only one is needed as an exhaust and ventilator.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurably the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy, for years has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

## Paid Taxes With Coppers

Indiana Man Had Over Thirteen Thousand In Change

David Johnson and a companion attracted the eye of a policeman when they hoisted a tool chest to the top step at the city hall, then sat back exhausted.

"Where are you going with that box?" asked the officer. "Going to pay my taxes," replied Johnson. He opened the chest, took out 13,700 pennies and got a receipt for his \$137 assessment.

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 422 degrees below zero.

## Teething

"Baby's Own Tablets take away that terrible fever," writes Mrs. Alfred Bumpay, North Sydney, N.S. Effective also in relieving colds, fever, colic, upset stomach, constipation. Children like them. Absolutely SAFE. See analysis certificate in each 25c package. 211

Dr. Williams' BABY'S OWN TABLETS

W. N. U. 1942

## Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at "The Pas" of a Mountie patrol under Constable W. Barret, bringing the body of Oscar Morrell, missing trapper, from one of his trapline shacks 34 miles east of Mile 374 on the Hudson Bay Railway lines.

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It is believed while covering his trapline he accidentally discharged his rifle and blew off his right hand. Driving his team of dogs, he staggered through the snow to one of his trap-line shacks, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out to search for him, and broke into his shack to find his body in the grim setting of his lonely struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatchewan before coming north to trap.

## New R.C.M.P. Appointment

Inspector T. V. Sandys Wunsch Named Successor To Inspector Joy

A member of the Royal Canadian Mounted Police for more than a score of years, Inspector T. V. Sandys Wunsch, who is now stationed at Cranbrook, B.C., was announced recently by Major-General J. H. MacBrien, commissioner of the R.C.M.P. He succeeds Inspector A. H. Joy, famous Arctic officer, who died at Ottawa, April 29. The new inspector of the eastern Arctic will have his headquarters in Montreal.

Inspector Wunsch will visit his far northern posts this summer, leaving for the Arctic, July 9, aboard the Hudson's Bay Company vessel "Ungava."

## Isabella Horses Are Scarce

Special Breed Can Be Obtained Only In Germany

Isabella hofes are being sought in Germany by Captain Hopkins, regarded as one of the best judges of horses in India, at the behest of a Maharajah. They are a special breed with brownish yellow coats and white manes and tails. They are wanted to draw the Maharajah's state coaches. Horses of this type used to be bred throughout Europe by various princes, the studs of the Kings of Hanover in Herrenhausen, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

## Flivver Details Freight Train

Kneels Eight Freight Cars Off The Track at Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for lions to fight.

Recently at a level crossing near Gravenhurst, Ont., a "flivver" side-swiped a Canadian National Railway freight train and derailed eight cars, which charged screaming and died screaming, a total wreck, but in its death agony it guarded its owner-driver, T. E. Callon, Orillia, and another passenger, William McEachern, both of whom escaped with minor bruises. None of the train crew was injured.

## Got His Money's Worth

Two men entered a village church for which the tickets were a shilling each. The profits were to go toward providing comforts for the aged poor of the village.

Brown, after accounting for four cups of tea, a dozen sandwiches, three plates of bread and butter, five jam tarts and four tins, was passing his cup for the fifth time, when he turned to his companion, who was also doing well, and said, "I think everyone should encourage a thing of this sort—it's such a good cause."

King George's new six-months-old terrier refused to recognize anyone at Buckingham Palace except the king. The foreign-born amongst us flock to art museums and seem to enjoy them.

The two-family car seems to have supplanted the two-car family.

Thousands of MOTHERS ARE GRATEFUL

"... I wish I had known about this when I raised my first baby," so mothers tell us. "Freely, crying babies make mothers grow old. Our new baby Welfare book tells how to keep your baby laughing and well—a joy rather than a care. Write today and it will be mailed to you free."

The Borden Co. Limited, 212 George St., Toronto, Ont. Catalogue: Please send me 1942 copy of booklet entitled "Baby Welfare." Name \_\_\_\_\_ Address \_\_\_\_\_ C.W.19

EAGLE BRAND CONDENSED MILK

## Considering Plans For Railroad Across Sahara

Low Building Cost Great Incentive To French Deputies

The depression sometimes has curious and conflicting effects. From South America comes the report that it has led to the closing of the famous railroad over the Andes which links Argentina and Chile; from France dispatches relate that it has led to a definite and practical revival of the project for a railroad across the Sahara. If in the one case decreased traffic has made further operation unprofitable, in the other reduced costs of building material and a plentiful supply of labor are advanced as reasons which make this an especially propitious time for construction. The Saharan project is a gigantic undertaking which demands for its success the economic exploitation of a vast area of land which is now virtually useless. The cost of the railroad itself, entirely apart from the scheme for developing vast irrigation works in the Sahara to be fed by a canal from the Mediterranean, is put at \$100,000,000. That an influential group of French Deputies is even considering a Saharan railroad at a time like this is striking evidence that in France, at least, they apparently do not believe the world is coming to an end. We hope that if news of the closing of the two-mile-high line over the Andes reaches Paris, it will not discourage these promoters of what would probably be the world's lowest and flattest railroad.

Perian Balin—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety softness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and weather conditions. Makes hands soft and white. Creates an elusive, essential feminine charm. Perian Balin is indispensable to women of refinement.

## Problem For United States

In little more than twelve months nearly 400 persons have been kidnapped in the United States, mostly for ransom, which frequently has been forthcoming. Some of the victims are from comparatively humble homes, which shows that the criminals are extending their field. The crime is raising the dimensions of a national problem.

## Growing Their Own

Gardeners in Iceland are using the hot springs for horticultural purposes with such good results that they claim that Iceland need import no more foreign vegetables—they can grow sufficient to supply the whole island. The islanders are starting a campaign with the slogan: "Buy Icelandic."

Iron and steel plants in Japan are showing increasing activity.

## Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from Imperial trade conferences were urged by Hon. Frank Carrol, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carrol said in his address to the Canadian Club and Calgary Board of Trade members.

The speaker believed one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and economically find the solution to many problems now engrossing all the peoples of the empire." Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire.

Mr. Carrol's plan also included an empire educational campaign through the press, platform and radio; founding of an empire commercial university, assistance in the promotion of British branch factories; co-ordination of trade agencies and consular services; construction of empire warehouses in leading industrial centers, possibly by creation of free ports; interchange of business data through out the empire; uniform cable codes and, finally, effecting favorable treaties with world trading states.

### Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion Lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

### U.S. Wheat Exports

Made International Gain in March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 53. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus far this season amounted to 106,908,000 bushels against 102,309,000 a year ago.

### Development Of Aerial Photography

Notable progress has been made in Canada in the employment of oblique and vertical aerial photographs for mapping some of the little known parts of the Dominion. The Topographical Survey Branch of the Department of the Interior, is the central clearing house for aerial photography in Canada, over 550,000 photographs being on file in that branch to date.

"Are you going to take this lying down?" boomed the candidate. "Of course not," said a voice from the rear of the hall, the shorthand reporters are doing that."

"When is high tide, captain?" "At 5.55 p.m. But I have told you twice already." "But your chin waggles so comically when you say 5.55."—Hummel, Hamburg.

### Criticism For Food Fads

Three Factors Determined Proper Diet Opinion Of Expert

Magazine and newspaper advertisements which state that certain food products are indispensable to the human diet came in for stiff criticism from Dr. I. M. Rabinowitch, assistant professor of medicine at McGill University, and director of the department of metabolism at the General Hospital, in an address to members of the Montreal Canadian Club recently. Three factors alone determined the diet of man and these, he said, were the food available, his ability to secure such food and the food's taste, digestibility and richness of nutrient matter.

According to orange growers, he said, half the world had acidosis and the other half were about to have it and for these they urged the use of orange juice in the diet.

"Life insurance firms who examine applicants for policies do not ask these people if they drink coffee," he said after quoting an advertisement predicting the alleged horrible fate of coffee-drinkers by the manufacturers of a non-caffeine beverage.

"We are urged to consume huge quantities of milk if we wish to be healthy," he continued, "but with all mammals, the young receive milk from the female parent for a definite period and no longer." In some parts of the world, he pointed out, "milk is a rarity, yet people who live there do not die off like flies."

SMALL DAUGHTER FOLLOWS SUIT IN GUMPE DRESS

ADD this new gumpe dress to small daughter's wardrobe—both you and she will love it! The clever design of this model has taken yellow swiss with white dots in the blouse. Plain linen in French blue made the skirt and suspender straps. It's a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this cunning model. Tomato-red plique with white dimity with tiny pin red dots is very effective. Navy blue sheer wool with the gumpe of red and white checked gingham is quaint and extremely fashionable.

Style No. 434 is designed for sizes 6, 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 35-inch material for blouse and 1 3/4 yards of 30-inch material for skirt and trim.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Four new minerals have been added to the list of materials of which the earth's crust is made.

## Bees Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies During the winter months there is little or no activity within a bee colony, during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

Sometime last fall the queen ceased her egg-laying, and as the combs became empty of brood they were filled with food for the winter. As the weather became cool the bees gradually clustered closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive, at all times keeping in contact with the food supply. Towards spring an unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In outdoor wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather.

In some localities such activity may be resumed even earlier. Cellular wintered bees do not usually start so early as outdoor wintered bees, except under abnormal conditions. This early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the number of eggs laid during the early part of the season, the larger will be the field force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an abundant food supply, and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

### Another Step Forward

Short Cut In Method Of Cancer Diagnosis Found

A short cut in cancer diagnosis promising more hope for the most malignant cases was shown to the American Medical Association at New Orleans.

This new method enables an expert with a microscope to see at almost one glance whether a cancer can be benefited by radium. About one-third of all cancers are helped by radium while the other two-thirds are not. The very malignant growths fall largely in the radium class and as they are the fastest spreading, the time saved in diagnosis is also life saving.

Telephone wires in East Africa have to be carried on exceptionally high poles owing to the liability of giraffes breaking the cables.

### PROMOTED

L. A. B. Hutton, newly appointed superintendent of the Department of Communications, Algoma district, of the Canadian Pacific Railway. Mr. Hutton was inspector of telegraphs as the department was formerly called, at Calgary, until the fall of 1931, when he was transferred to Winnipeg in the same capacity. His headquarters are now at Sudbury, Ontario.

### Plants Valuable In Detecting Gas Leaks

Suggested As Safety Precaution For Crew Of Submarine

Crews of submarines may in future carry potted tomato plants with them as sailors on bigger ships have parrots and goats.

But these green mascots will not be merely pets; like everything else in the crowded interior of a "sub," they will have to pay their way. And they can do it by giving warning of gas leaks long before even that most sensitive of animal detectives, the canary, could detect them.

This is one of the possible uses for the peculiar behaviour of plants in the presence of ethylene gas that was suggested by Dr. William Crocker of the Boyce Thompson Institute for Plant Research, speaking at one of the closing sessions of the American Philosophical Society's meeting at Philadelphia.

The value of many plants for this purpose depends on the curious behaviour of their petioles or leaf-stems in the presence of very dilute quantities of ethylene gas, a common ingredient of illuminating gas and almost invariably present with carbon monoxide.

Dilutions of ethylene as low as one part in ten million of air will cause tomato leaf stems to begin growing on the upper side where they did not grow before, thus causing them to bend downward instead of up. This effect was first demonstrated several years ago by Sarah L. Doubt, and has since been the subject of much research by Dr. Crocker and other plant physiologists.

"If a potted plant is turned upside down and then exposed to ethylene it does not react. The reason is that the ethylene anesthetizes the plant, destroying its response to the pull of gravity."

The oldest oak forest in Europe is standing in Oldenburg, North Germany. The trees date back to the Middle Ages.

## Report Of Committee Favors A Nationally-Owned Radio Broadcasting System For Canada

### Schools Need Freedom

English Taking Advantage Of New Idea Of Education

English education is very much alive. There are still dull patches in it, of course; but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community. Three times before in history English education has flushed with renewed energy; first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are at liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of towns and villages, of factories, shops and farms. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

### Seed Oats From Alberta

Further Supply Has Been Ordered For Saskatchewan Areas

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. M. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta only as the surplus supply of seed oats in the Peace River country has been used.

Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been insufficient.

### Will Not Need Fire

Civilization Of Future Will No Doubt Have Substitute

The prediction that fire, which has played so strategic and friendly a role in man's progress, will be needless in future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that other natural forces will be utilized. The germ of this future phase of civilization is already developing in modern invention, Dr. Hough said.

### Record For Inventions

The Wall Street Journal says: "Depression, as well as necessity, may lay claim to being the parent of invention, for within the last six months the number of inventions patented or awaiting patent papers is greater than in any similar period on record in this country. It seems that unemployed men are using their enforced leisure to perfect mechanical devices of all sorts."

Canada will have a nationally-owned radio broadcasting system if the report tabled in the House of Commons is implemented by parliament.

Highlights of the report are: Establishment of a chain of high-power national stations located at suitable intervals across Canada, their exact position to be determined after a careful technical survey. Appointment of a federal commission of three, with assistant commissioners for each province, "to carry on the business of broadcasting." Establishment of trans-Canada chain broadcasting as "one of the first duties" of the commission.

All revenues from license fees and advertising to be limited to not more than five per cent. of each program period.

Location, where required and under private ownership if desired, of as many stations of 100 watts or under as may be deemed necessary for complete coverage.

The report, which was brief and left the working out of details to the commission pays tribute to the present radio broadcasting stations in the following words:

"They entered as pioneers in a field of service in the art of radio and, under trying handicaps and sacrifices, worthily kept pace with a science fraught with ever-changing improvements and developments, and rendered this service under handicaps, which is most noteworthy."

The committee expressed the belief, however, "that the present system, excellent as it is in certain respects, does not meet the requirements in quality and scope of broadcasting to insure its maximum benefits."

The report, presented by Hon. Dr. Raymond Morand (Cons., Essex East), bears the endorsement of the entire committee of nine members.

### Great Spread In Prices

Varying Cost Of Foodstuffs In U.S. Is Puzzling

If we had some ham we could have some ham and eggs if we had seven cents if we lived in Texas.

The department of agriculture has discovered eggs are seven cents a dozen in Texas and 22.8 cents in Massachusetts.

It finds prices of foodstuffs vary throughout the country as much as 300 per cent.

Apples cost anywhere from 55 cents a bushel to \$1.35; chickens from nine cents a pound to 20.5 cents; farm prices of lambs range from 4.3 to seven cents a pound; sheep from 2.1 to 4.7 cents; calves from 3.9 to 8.4 cents; beef cattle from 2.6 to 5.5; wheat sells for 35 cents in Oklahoma and 84 cents in Georgia.

In some states the average prices for farm products are so low as to read like a price list of 1832.

### Saving Canada's Antelope

Interesting Chapter In The Story Of Wild Life Conservation

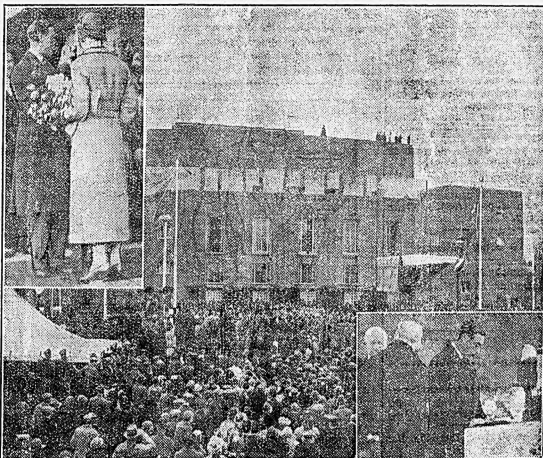

The history of Nemiskam National Park, Alberta, Canada, is an interesting chapter in the story of wild life conservation. Overcoming what appeared to be insurmountable difficulties, forty-two antelope were enclosed in a fenced-in area in southwestern Alberta in 1915, and, in contrast to previous experiments, continued to thrive in captivity. Their welfare and propagation, which at first was a matter of speculation, now seem to be definitely assured, as officials of the National Parks of Canada, Department of the Interior, report that the herd now totals 125.

Siberia is nearly twice as large in area as Canada.

"Master, I've found lion tracks in the north." "Good, let us go south immediately."—Hummel, Hamburg.

### THE GREAT DAY AT STRATFORD-ON-AVON

These pictures give a few glimpses of the ceremonies which marked the opening of the Shakespeare Memorial Theatre at Stratford-on-Avon, England. The main photograph shows part of the huge crowd gathered in front of the new theatre while inset (top left) the Prince of Wales is introduced to Miss Elizabeth Scott, the architect. Lower right, His Royal Highness can be seen making his speech at the opening of the Memorial Theatre.

## RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

*Castoria*  
**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

Lord Irwin, former viceroy of India, said he was encouraged by the spirit of optimism in western Canada.

Prince Peter of Montenegro, brother of Queen Elena of Italy, died recently at Bolzano, Italy.

Green peas, the seed of which are said to have come from King Tutankhamen's tomb, are being grown by M. Pejstrup at Pass Lake, Ontario.

The United States senate rejected a proposal for a year's suspension of military and naval armament construction.

There has been an increase of 580 head of cattle shipped to Great Britain through Montreal port over the same period last year.

Manitoba, Saskatchewan, and Alberta government representatives will meet early in June to prepare statements for the forthcoming Imperial Economic Conference.

Captain Hilton H. Bailey, who with Simon Lake, the inventor of the submarine, hopes to raise the "Luistanka," states actual work on the project will begin early this fall.

Commander F. W. Nelles has been appointed commander in charge of Halifax naval port. Commander V. C. Brodeur at Halifax now will go to Esquimaut.

It is proposed to form a pool for carrying on export business from Canada to Latin-America, to prevent Canadian goods losing their identity on passing through United States hands.

Winston Churchill, former Chancellor of the Exchequer, in an address recently, asked the United States and Great Britain to join forces in leading the world "out of these gloomy caverns into the broad sunlight of activity and progress."

If the Dominion Government assumes 75 per cent. of old age pension costs, the City of Calgary will ask the Alberta Government to assume the 10 per cent. of the cost now borne by this city, according to a statement by Mayor Andy Davison.

Claims Founding Of Club  
Although the city of Hamilton is reported to be planning to celebrate this year the 40th anniversary of the origin of the Canadian Club, it is claimed Guelph was the city where the club had its birth. It is contended Malcolm MacCormack, farmer school principal here, founded the club in 1888 along with a group of prominent Guelph men.

Light from a cloudy sky is equal to a brightness of 225 candlepower square foot.

## Acidity Overcome Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, gentle, effective tonic to build liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkgs., everywhere. Ask for Carter's by NAME.

W. H. U. 1942

## Paradise For Fishermen

Once Barren Lakes In North Now Teeming With Trout  
Trout fry placed in the heretofore barren waters of the Medicine-Maligne Lake system in Jasper Park by the fish culture branch of the Department of Fisheries, grew and multiplied so quickly that during the past summer fish as heavy as six pounds were taken by anglers and there seemed to be a limitless supply.

Using rod and line for test fishing in Maligne, Dr. Bajkow and Dr. Neave found sport "so good that three or four hours with one rod produced over 100 pounds of fish." In Beaver Lake which lies about a mile from the southern portion of Medicine Lake, "as soon as the spoon struck the water the trout rushed from all directions." In order to get some further idea to the abundance of the fish, the investigators set a 30-foot gill net in Beaver Lake. "Over 400 fish were caught in about two hours, so that most of the next two hours had to be spent in cutting the meshes of the net and releasing the fish into the lake again."

The trout are growing to be big fellows, too. "The first fry put into the Medicine-Maligne system by the fish culture people were distributed in 1928. That's only three years ago, but a trout taken in Maligne Lake a few weeks ago tipped the scale at six pounds, an exceptional weight for a 3-year-old speckled trout."

Winnipeg Newspaper Union  
*Fashion*

IT CATER FOR A SCARF EFFECT  
THAT WILL "STAY PUT"

Delightfully young and smart is this new slim-line model.

Since crepe silk both plain and print is so charming, it was chosen for this fascinating model.

It is light navy blue spotted in red. The soft creased scarf collar gives it such distinction in plain white crepe.

Another idea suggestion is plain crepe in soft beige shade self-trimmed.

For summer wear, handkerchief linen prints, batiste prints and tub silks are nice mediums.

You'll find it very simple to fashion, and the cost unbelievably small. Style No. 899 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 16 requires 9 1/2 yards of 30-inch material with 1/2 yard of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Is Still a Mystery

No Trace Of Winnipeg Child Who Disappeared Four Years Ago  
Torn and yellowed with time, a circular hangs on the bulletin board of Winnipeg's central police station offering a reward for information leading to the discovery of Julia Johnson, a mute reminder of Winnipeg's parallel to the recent kidnapping of Augustus Lindbergh, Jr.

Four years ago Julia, a laughing-eyed Polish girl, vanished from in front of her home as mysteriously as the little son of the flying colonel. Efforts of the police of an entire continent were immediately enlisted in an effort to trace the tot, but without success.

No demands for ransom were received following Julia's disappearance. She was reported to have been seen in various sections of the city in the company of an old man. Police dogs were put on her trail and hundreds of citizens organized search parties which led into remote corners of Manitoba in a fruitless attempt to find a solution of her disappearance.

Julia would now be nine years old. Her parents still believe she will be found some day. Each year a candle is added in her home and the sympathy of at least one Winnipeg mother goes out to Mrs. Anne Morrow Lindbergh in the loss of her baby in a way that only a fellow sufferer can understand.

## Collected Queer Articles

So-Called Pauper With Fortune In Bank Had Old Hobby

Investigators in Hamilton, Ontario, probing the strange case of Abadiah Markle, the so-called pauper who died leaving a bank account of \$14,000 found themselves faced with the most baffling collection of articles ever seen outside of a museum today.

Markle died over a month ago, apparently in penury, and was buried at the city's expense. Later it was discovered he had \$14,000 in the bank. Large packing cases were located in a storage warehouse, in Markle's name, and were opened in the presence of witnesses.

Among the things found were these: Note-paper of the Royal Hotel, many years defunct; 200 rubber heels, old-fashioned buttons, rubber tips, fronts, a collection of 300 hats—coachmen's hats, plaid caps, derbies which revealed every fashion from the 80's onward; a large assortment of keys for opening sardine cans; huge stocks of bedding, coat buttons, hairpins, powder puffs of yesteryear, sample books of greeting cards, paper ice cream spoons and many other peculiar articles.

## Largest Welded Bridge

What is considered the largest welded bridge in the world has just been completed in Pilsen, Czechoslovakia. It crosses two railroad tracks, has a span of 161.4 feet, and a width of 27.4 feet. The total weight is 145 metric tons, which is said to be 21 per cent. less than that of a riveted structure designed for the same purpose. Another unusual feature is the spiral ramp at one end, necessitated by limited space.

My dear friend—let bygones be bygones—now we do a little business together—no?"—Dally Herald, London, England.

## Great Canadian Hero

Colonel Mulloy Set High Example For Loyalty To The Empire

Colonel Lorne Winfield Mulloy, D.C.M., B.A., died unexpectedly at his home on the St. Lawrence River, Iroquois, Ontario, at 11 p.m. Sunday, February 21st, 1932, from heart attack, aged 63 years. Thus, with dramatic suddenness, there was removed from Canadian public life, one of its most brilliant intellects and inspiring figures.

Blinded in the South African War, Colonel Mulloy mastered every obstacle imposed by his wounds, cheerfully endured fresh obstacles to surmount, scorned the paths of least resistance, was supremely successful in all tasks he undertook, and his death came at a time when his powers of intellect and his great executive abilities appeared destined to still further achievements.

Born on a Canadian farm, blinded in his early twenties, he continued his education with the aid of a secretary, graduated with honors from two famous universities, became one of the most outstanding speakers of our day on subjects of political economy, was offered more than once a seat in the British House of Commons, was on the staff of the Royal Military College, became a successful practising lawyer, and his services to Canada during, and immediately after the war, were sufficiently conspicuous to deserve amplification.

He has been referred to as the father of Union Government in Canada. His fight and arguments for compulsory military service are believed to have been the deciding factor in causing the United States to declare against the inefficiency of voluntary enlistment.

As early as 1910 he was one of the leaders in Great Britain in the fight for tariff reform and Empire preferences, such as are now being negotiated by the several governments affected.

Mulloy's physical handicap was not perceptible to his friends, and he refused to recognize his lack of sight as either a misfortune or a handicap. His physical assurance was magnificent. He could swim, ride, row, fish, or drive a golf ball with any man. Alone he has piloted a row boat across the St. Lawrence River in a gale.

He could outpace a fishing line more quickly than any companion. He never walked except at a stride. He has ever been an incessant traveller, and he never had an accident!

His humour was scintillating, clear and infectious; invariably he looked through and beyond the dark side of life. He was the soul of sincerity, generosity and integrity.

Mulloy's life should be printed in every school book, told from every pulpit and repeated at every Canadian fireside. As a practical and thrilling inspiration to the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be exceeded.

## Some Amazing Facts

Many Objects Which Seem Small Are Very Wonderful

A drop of blood contains three million red globules, and there are more germs in the milt of a single codfish than men in the world. So small is this germ that one grain of sand is four million times larger than it. A hundred threads of the silkworm are just one-twenty-fifth of an inch thick when placed side by side, but there are some metals that can be drawn out to such a fineness that twelve hundred wires are only as thick as a hundred silkworm threads.

Old Faithful geyser in Yellowstone national park shoots to a height of from 85 to 130 feet.

## SUNDAY SCHOOL LESSON

MAY 22

JACOB AND ESAU RECONCILED

Golden Text: "Be ye kind one to another, tenderhearted, forgiving each other, even as God also in Christ forgave you."—Ephesians 4:32.  
Lesson: Genesis 32, 33.  
Devotional Reading: Matthew 6: 9-15.

## Explanations and Comments

Jacob's Precautions, verses 1, 2.—Looking up Jacob saw Esau approaching with four hundred men. The presence of so many men with Esau may be accounted for by his having just made his expedition to Mount Seir, where he conquered the land in which he afterwards settled, Genesis 36:6, 7. Edersheim suggests that he may have wished at the same time to make his brother anxious and to show him the contrast between their respective positions. Jacob evidently feared the worst. He was keenly aware of what he deserved at his brother's hands. He arranged his little company and put the handmaids and their children first, Leah and her children next, and in the safest place in the rear, his best-loved ones, Rachel and Joseph.

"Thoughts of law neglect to curb transgression, The court of conscience always is in session."

The Meeting Of The Brothers, verses 3-11.—Jacob passed over the ford first and showed Esau the greatest reverence by bowing himself to the ground seven times. Esau ran to meet and embrace Jacob, falling on his neck and kissing him as was the custom among friends. Had Jacob's present and his flattering attitude disarmed him? Dr. Skinner thinks that Esau's intentions were hostile and that Jacob gained a diplomatic victory over him. Rather does it seem that Esau had no thought of vengeance, he had dismissed the affair of the birthright with a shrug as it were, and now virtually said, "Don't mention our trouble. I have got along famously without the birthright and without you."

What the actuating motive he was magnanimous.

"If thou must have thy revenge on thy enemy, heap coals of fire on his head, forgive him, and enjoy it!"—Thomas Browne.

## Recipes For This Week

(By Betty Barclay)

### LEMON SPONGE PIE

(Makes 1 pie)

3 egg yolks, beaten thick.

5 tablespoons lemon juice.

1 teaspoon grated lemon rind.

1 cup sugar.

3 tablespoons flour.

1/2 teaspoon salt.

1 tablespoon melted butter.

1 1/2 cups milk.

8 egg whites.

Uncooked pastry.

Combine all ingredients, folding in last stiffly beaten egg whites. Turn into pie tin lined with uncooked pastry and put into hot oven (450 degrees Fahrenheit). After 10 minutes reduce heat to moderate (350 degrees Fahrenheit) and bake 20 minutes longer, or until filling is firm.

### ALL-BRAN QUICK BREAD

8 cups flour.

2 cups all-bran.

1/2 teaspoon salt.

1/2 teaspoon soda.

2 teaspoons baking powder.

1 tablespoon sugar.

1/2 cup molasses.

2 cups milk.

2 tablespoons melted butter.

1 cup chopped nuts.

Stir dry ingredients. Add bran. Then add molasses, egg slightly beaten to milk. Stir into dry ingredients, mixing well. Add nuts and melted shortening. Pour into a well greased loaf pan. Let stand 15 minutes. Bake in moderate oven, (325 degrees Fahrenheit) from one to one and one-half hours.

## Story Of Near Disaster

Crew Of Small Motor Tanker Fight Blazing Fire While Crossing Atlantic

Trapped by a blazing fire while crossing the Atlantic the crew of the little motor tanker "John George," fought for hours to subdue a blaze that threatened destruction of the 79-ton vessel. For 26 days after the blaze had been extinguished the 130-foot ship was steered by hand all the way across the ocean and brought into Montreal.

The story of near disaster to the "John George" was related in a casual way by her captain, Arthur Storey, The "John George," en route to the Imperial Oil Works at Toronto, left Greenwich April 7.

## May X-Ray Insulin

The University of Illinois announced successful completion of the first step of a series of experiments which will enable scientists to use the x-ray in studying insulin, the rare and expensive solid used in treatment of diabetic patients.

## "LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS  
HUGH TREVOR

## Famous Screen Star

"The women who want to win and hold adoration should keep youth!"—Hugh Trevor says.

"Stage and screen stars hold the admiration they have won year after year. Birthdays don't matter at all. And nowadays other women are learning their complexion secret!"

"Every woman should learn the complexion secret these screen stars know!"

The stars do know the secret of growing lovelier each year! "Regular care with fragrant Lux Toilet Soap is the secret," the famous actresses will tell you. "This lovely white soap keeps skin youthfully glow."

That is why Lux Toilet Soap is the official soap in the dressing rooms of all the great film studios. Your skin will respond to it, too! The caress of dollar-a-cake French soap is just 10c a cake!

## Makes Hazardous Trip

Eskimo Brings Sick Wife To Church-

Ill In Small Boat

The dangers of two-hundred mile trip in an open boat, little better than a canoe, through the ice-filled waters of Hudson Bay were faced by Eskolo Enuk, young Eskimo hunter, in bringing his wife to Churchill to receive "white man's medicine."

His wife took sick and as she sank lower Eskolo determined to risk all in the hope the hospital at Churchill would save her life. Unable to travel by dog team, he took out his seal-covered boat and set out on the long trip. He hugged the rugged coast line of the bay, avoiding the ice that swept round him and threatened to swamp his canoe with the precious burden.

For nearly two weeks he travelled. His store of food was nearly exhausted, and he was visibly worn, with the hardship of the long paddle, when he crawled over the ice surrounding the port bringing in his wife.

Medical men at Churchill say that his wife has a minor stomach trouble that will be easily cured under proper care but would have likely cost her life if she had not been rushed down to receive medical attention.

Eskolo brought a big collection of furs to pay for the white man's magic, but workmen here have taken up a collection to pay his expenses.

## Russia Arranges

Credit With Turkey

Based On Goods Exchange Without

Actual Money Payments

A new economic alliance between Soviet Russia and Turkey, under which this country is extending an \$8,000,000 long term credit to its Islamic neighbor, has been announced by Foreign Minister Tewfik Ruzhdi Bey of Turkey.

The credit is the first ever granted by the Soviet Government, which until now has been a seeker instead of a giver of credit in the world market. It is based on an exchange of goods in kind without actual monetary payments.

Under the agreement Soviet Russia will sell industrial tools, agricultural machines and fertilizers to Turkey, receiving as payments its choice of Turkish natural resources, such as tobacco, wool, fruits and minerals.

Czechoslovakia may increase its sales tax by 25 per cent.

## LIFELESS FORM OF LINDBERGH BABY IS FOUND

Trenton, N.J.—Two tremendous blows on the head ended the life of Charles A. Lindbergh, Jr., the official autopsy by Dr. Charles A. Mitchell, county physician, disclosed.

The autopsy showed that the skull had been fractured on the left side, the fracture extending from the top to just behind the left ear. The second blow was dealt on the right side of the head just back of the right ear, and left a hole one-half inch in diameter.

It was as if some adult person had held the baby tightly in his arms and deliberately hammered the head with the purpose of causing instant death.

The diagnosis was:

"The cause of death is a fractured skull due to external violence."

Dr. Mitchell's report confirmed that decomposition of the body had progressed to the point where it could be surmised that the child had been killed almost immediately after the kidnapping, depending on climatic and other conditions that might have produced such results.

The autopsy also indicated that the body had not been disturbed, probably since it had been buried, although this point was not covered definitely.

Teeth, cranial and other bone formations were given to confirm the identification of the child, although the autopsy was purely technical and itself did not try to establish identity.

Dr. Mitchell said there was evidence of a hemorrhage on the inner surface of the left side of the skull at the point of fracture. This would indicate that the blow on the left side of the head might have been the one that actually caused death.

The scalp was so badly decomposed that it was impossible to find any contusions or hemorrhagic conditions external to the skull, Dr. Mitchell added. Thus it was impossible from a diagnostic point of view to aid the police in the hunt for the actual instrument of death.

The autopsy reports did not speculate as to blows and such, but left the diagnosis at "external violence."

Physicians usually pronounce such fractures, however, as due to blows delivered on the head rather than accidental fractures.

## Tax Boost In Ireland

Step Increases In Tariffs Proposed In De Valera Budget

Dublin, Irish Free State.—Step increases in tariffs and income taxes were proposed in the first budget of the De Valera government, which was introduced in the dail eireann.

The budget provided for a duty on tea of four pence a pound and a package tax of two pence on each container holding any article of food or drink, or cosmetics or medical preparations packed for sale.

The income tax rate would be raised from three shillings six pence to five shillings in the pound.

Drastic action was necessary to make both ends meet in the nation's finances because President De Valera's government faced a budgetary deficit of £3,500,000.

The budget provided for extending the entertainment tax to cover dancing, outdoor sports, horse racing and dog racing. It also set forth an increase of one shilling two pence a pound in the duty on tobacco.

## An International Problem

Present Economic Crisis In World Wide and Too Deep-Seated For Individual Action

Quebec, Que.—Unemployment is an international problem and must receive international consideration, Tom Moore, president of the Trades and Labor Congress of Canada, said when he arrived here on the Canadian Pacific liner "Empress of Australia." Mr. Moore was a Canadian labor delegate to the International Labor Conference at Geneva.

Unemployment formed the chief topic of discussion at the conference, Mr. Moore said, and delegates agreed that the present economic crisis is world-wide and too deep-seated for individual action.

Typhoon Takes Many Lives Hanoi, French Indo-China.—The resident-general was informed 134 bodies had been washed ashore in the State of Annam since a recent typhoon struck the territory. Five hundred lives were lost altogether, 600 houses were destroyed and fleets of small fishing boats went to the bottom.

W. N. U. 1942

## Drama Of the Skies

Two Men Of Mooring Crew Lose Lives When Dirigible Attempts To Land

Camp Kearney, Calif.—A tragic drama of the skies was written in an unsuccessful attempt of the world's largest airship, the "U.S.S. Akron," to land here.

Two men of the mooring crew were dashed to death and a third, Bud Cowart, was carried two hours dangling on a 300-foot rope from the navy airship.

Ten thousand spectators saw the two fall as the dirigible surged upward. Cowart swung precariously half a mile over their heads. Women screamed, men wept.

Then he was rescued, hauled into a hatch of the big ship. A message dropped from the big rig.

"Cowart OK," it read.

A vast sigh of relief went up. The climax to the westward crossing of the Akron, which left Lakehurst, N.J., on its first trans-continental trip, came during efforts to make an emergency mooring at Camp Kearney after an aerial voyage fraught with storms.

Several attempts to bring the great skyliner down had been made by a determined ground crew when upward currents suddenly caught the great ship.

Robert Edfall and Nigel Henton, both of the San Diego naval training station, and Cowart clung to the landing line, to the horror of the watching throng as the Akron surged upward. Edfall and Henton lost their grip and fell to death, but Cowart clung on.

Upward the great ship swept with Cowart dangling on the line 300 feet below the dirigible. A height of 2,000 feet was reached but Cowart maintained his precarious grip. Through bumpy air the Akron sailed, but Cowart clung on.

Minutes that seemed like hours to the gasping crowd below passed as the Akron cruised through the bumpy air, rocking up and down, with the plucky Cowart dragging along. Then it was noted the distance between Cowart and the Akron began slowly to diminish.

There was no winch on the rope. It was slow work hoisting Cowart up by hand. At last he was dragged through a cockpit.

## No Wheat Bonus

Both Bushel and Acreage Basis Plans Are Rejected

Ottawa, Ont.—A bonus scheme for wheat, on both a bushel and acreage basis, was turned down definitely by the House of Commons. Without a recorded vote two motions were defeated, the first from Robert Gardiner, leader of the farm bloc, suggesting continuation of the five cent bounty on export wheat, and the second from Dr. Thomas Donnelly, Liberal, Willow Bunch, proposing a five cent bonus on a seed-acreage basis.

In discussing the question of wheat in its relation to the welfare of Canada and its importance to Canadian export trade, it must be remembered that the greatest proportion of wheat was produced in the prairie provinces, Mr. Gardiner declared. During the early part of the present century many people had been induced to go to western Canada by the great opportunities which were said to lie there in wheat-growing.

Progressive members had been long awaiting some declaration of policy from the government with regard to the wheat-growers. Mr. Gardiner realized that the members of the government were bearing tremendous responsibilities, and felt sympathy with them in the burden they were called upon to bear. But that fact did not relieve him from the responsibility of inquiring from the government what the policy was.

"We produce the best wheat in the world, and we are proud of it," Mr. Gardiner continued. But it cost about 76 cents a bushel to produce No. 1 wheat on the basis of twenty bushels to the acre. The price level for No. 1 wheat at the head of the lakes was approximately 50 cents a bushel. Consequently every bushel grown meant a loss of seventeen cents. The wheat farmer could not keep on very long with such prices.

Price of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

## Delegates Sail For Home

Hamilton, Bermuda.—Carrying with them to their home parliaments new information on imperial trade, British and Canadian delegations to the tri-partite conference here sailed from Bermuda May 11. Work of the conference was concluded May 9.

## NEW POLITICAL PARTY ADVANCED FOR ALBERTA

Drumheller, Alberta.—An independent political organization for Alberta, drawing its support from all spheres of life and from all old political units was announced by F. C. Moyer, Independent M.L.A. for Drumheller, in an attack on the Farmer Government of Alberta. Mr. Moyer was giving an account of the past session of the Alberta legislature to his constituents.

"This new party, to be called the Provincial Party, is a development and enlargement of the independent idea in Alberta politics, uniting all forces in opposition to the present government and enlisting all who are prepared to contribute their ideas and efforts toward the betterment of the province," Mr. Moyer declared.

"It is not a Conservative movement, it is not a Liberal movement, it is not the Farmer or Labor Party in a new guise. But we welcome all who seek not the success of a party but of a people. No one person or group has a monopoly of wisdom, so we seek all classes that we may have a cross-section of the life of the province."

In launching the plans for organization of the Provincial Party, Mr. Moyer emphasized that it would be based on the Independent principle. No candidate who was elected under the auspices of the new party would be forced to follow the dictates of the party's cabinet if it were elected to power in Alberta.

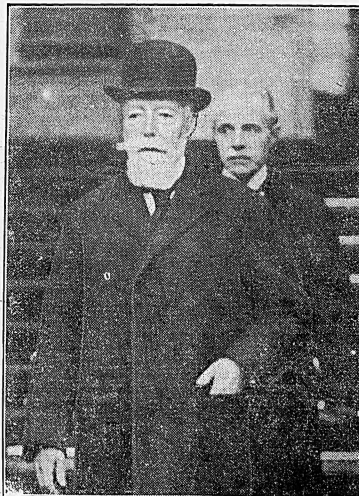

"We want the elected members to go on the floor of the legislatures and speak as their judgment dictates. This of course," he said, "involves the abolition of the old rule that the defeat of a government bill means the resignation of the ministry. But why should the government resign except on a want of confidence motion? The mayor does not resign if some idea of his is overruled."

"We believe this system will result in better legislation and better legislators. If you keep a child in swaddling clothes it will never develop to much of a man, and if you stultify the intelligence and expression of a private member of the government side, by making him simply a voting unit, you may lose the aid of one who might have developed into a real counselor. Why should not our legislation be the thought of the majority of the whole legislature instead of the majority of the government group?"

On the proportion of votes cast at the general elections in Alberta in 1930, said Mr. Moyer, the representatives should have nine representatives in the legislature. Instead, they had only three.

Referring to organization, Mr. Moyer said that because he was the present leader of the group of three Independents, it did not necessarily follow that he would be the leader of the Provincial Party. "Many strong men will be found in our ranks after the next election, and it is for them to elect a leader," he declared.

## FRENCH PRESIDENT VICTIM OF ASSASSIN'S BULLETS

The report of the death of President Doumer of France as a result of assassin's bullets shocked the world. Doumer was one of the most popular presidents France has had, and his death at the hands of a fanatical Russian was a blow to his country. This photograph was taken recently as he was leaving the Senate Chamber in Paris.

## HELD IN SLAYING

Filing a murder charge against Captain W. N. Lancaster, British aviator and partner of Mrs. Jessie Keith-Miller, Australian flier, climaxed a ten-day investigation into the death of Haden Clark, author, at Miami, Florida. It is believed that Clark had taken his own life, but now police charge that notes which led to that belief were forged.

## Salvage Crews Working On Grain Elevators

Estimated Loss From Incendiary Fire Set At \$75,000

Meacham, Sask.—Salvage crews have commenced in the work of clearing up the debris of the three local elevators which were destroyed by incendiary fires May 7, with a resultant loss of 70,000 bushels of grain.

Estimated loss from the fires, including loss of wheat, has been set at \$75,000.

It is expected that the work of clearing up would take about two weeks. The Saskatchewan Wheat Pool, Alberta Pacific Grain Company and Standard Grain Company, owners of the three elevators, have signified their intention of rebuilding the structures.

R.C.M.P. are still investigating.

## Alberta Commission To Investigate Banking

Canadian Finance In General Will Be Subject Of Study

Edmonton, Alberta.—Appointment of a commission to make a thorough study of Canadian finance and banking and investigation of systems of leasing public lands instead of home-ownership or outright selling of land was announced by Premier J. E. Brownlee. The commission will also study finance in general.

Through its investigation of the Canada Bank Act, which will be one of its primary functions, the commission will be instructed to bring in a report in anticipation of revision of the act slated for the next session of the Dominion parliament.

## Allowed To Sell Cattle

Moscow, Russia.—Russian farmers have been given the right to sell their cattle in the retail markets for the remainder of 1932. This marked another step in the liberalization of the Soviet farm code, to encourage individual farmers—whether collective or independent—to seek the open market.

## Creation Of Federal Farm Board Considered

Announcement Made At Ottawa By Hon. Robert Weir

Ottawa, Ont.—A commission of experts will inquire into the feasibility of creating a farm products marketing board.

Hon. Robert Weir, Minister of Agriculture, announced in the House of Commons that in view of the Imperial Economic Conference the government did not consider the board should be established at the present time.

A marketing board, to deal with exports of agricultural products has received considerable study in the past few months. Members from all parties in the House have contributed to the discussion.

It was understood the board's activities would apply not only to butter but to many farm products in which the exportable surplus is relatively small in comparison with the domestic consumption.

One of the board's functions would be to handle the export surplus in such a way that Canadian prices would not fluctuate widely, due to the domestic price being affected by the world figure.

## MILLIONS VESTED IN DOUKHOBOR HOLDINGS IN WEST

Victoria, B.C.—The extraordinary situation by which an enterprise valued at nearly six and one-half million dollars has been vested in the hands of Peter Veregin and 13 directors by the 5,000 Doukhobors of British Columbia, Alberta and Saskatchewan, is revealed in a study of the articles of incorporation.

With Veregin sentenced to three years in penitentiary following a perjury conviction in Yorkton, Sask., British Columbia authorities are watching carefully the future of the colonies in this province. It is stated that according to the constitution of the colonies it would be in the power of the 13 directors to expel the entire 5,000 members, under certain circumstances, and unless the government intervened. Such an action by the directors is very unlikely as the directorate has a payless army rolling up an increasing bank account. Veregin recently stated under oath that he had accumulated some \$700,000 during the past few years.

Incorporated as a Dominion corporation in April, 1917, with extra provincial registration in British Columbia, the Christian Community of Universal Brotherhood, Limited, of Canada, is capitalized at \$1,000,000. Of this capitalization, \$700,000 is paid up. But the issued shares are held in the names of Peter Veregin and 13 directors.

The colonists enjoy all belongings while members of the community, but have no right of ownership, having disposed themselves of such right some two years ago at a meeting in Brilliant, B.C. Members leaving or expelled forth their rights to property but may petition the supreme council of community economists which can allot them a share from the community's properties.

This latter provision, it is believed, has caused much of the Doukhobor trouble. The expelled Sons of Freedom are dissatisfied with the shares allotted them and have shown their indignation by nude parades and other activities which have brought them into conflict with the authorities. They refuse to attempt any court action against the community on the ground that it is against their religion.

Three courses are open to the 13 directors now that Veregin is under sentence. They may appoint a new leader, ask for a receivership, or request a winding-up order. It is believed disintegration might follow either one of the latter two courses, while a continuation of the present arrangements may not be acceptable to the young generation, who are said to be developing views in conflict with those of their elders.

Total Doukhobor holdings in Canada are shown as more than 67,000 acres of land, which, with other properties, are given a valuation of nearly \$6,500,000. Doukhobor activities in the three western provinces, outside of farming, include saw mills, planing mills, granaries, a box factory, a stove pipe factory, jam and canning establishments, fruit packing houses and a grain elevator.

Total Doukhobor assets in British Columbia are nearly \$4,500,000; in Saskatchewan more than \$1,250,000, and in Alberta more than \$500,000.

## STAND TAKEN ON IRISH QUESTION IS CRITICIZED

Manchester, England.—"What reason is there in presenting a stand at the Free State legislature while it is still only discussing the oath bill," asked the Manchester Guardian editorially in connection with the British Government's declaration that should the bill for abolition of the oath of allegiance be made law, Britain could not enter into any further agreements with the Free State.

"The underlying motive," the Manchester Guardian continued, "perhaps springs from Mr. Thomas (Dominions' Secretary) affection for poker. He has sat tight with a good hand for what has for him been a long time. He has seen Eamon de Valera getting the publicity and the limelight and he thinks now is the opportunity to call his bluff."

"It seems rather a dangerous game to play. Sometime or other, no doubt, the government would have to say Valera could not be both a caustic Republican and a loyal citizen of the commonwealth. The opportunity would have come fittingly at Ottawa when in the presence of the other members of the commonwealth the absurdity of De Valera's position could have been brought out."

"The strength of the British case has lain largely in the knowledge the Dominions are on our side."

The News-Chronicle of London, Liberal organ, complains this country appears to be leaving preparations for the Ottawa Imperial Economic Conference too much to Ottawa. The result so far, it adds, has not been particularly happy, making Prime Minister R. B. Bennett's position, "which is never very easy, quite unnecessarily difficult."

## Delegates Will Come From All Dominions

Full Representation Assumed For Imperial Conference At Ottawa

Ottawa, Ont.—Mutual advantage to every section of the far-flung Empire will be the objective of the Imperial Conference, which opens in Ottawa, July 21, said Premier R. B. Bennett, during an hour devoted to considering problems to be faced at the commonwealth gathering.

Preparations were well advanced, he said. Committees were gathering information on the three broad subjects to be discussed—trade, communications and currencies.

The Prime Minister will head the Canadian delegation and ministers will be called in, depending upon the subjects under review. Every Dominion has accepted the invitation to be represented, and with the exception of New Zealand and the Irish Free State have named their delegation, Mr. Bennett said.

## Special Tax Levied

Judges and Mounties Now Pay Ten Per Cent On Salaries

Ottawa, Ont.—Members of the judiciary, of the military, naval and air forces of Canada and of the Royal Canadian Mounted Police, other than enlisted men, will be required to pay a special income tax of 10 per cent upon their salaries during the fiscal year, 1932-33. They were not liable to pay this, previously.

A resolution, to this effect, in the name of the Minister of Finance, has been placed on the order paper of the House of Commons.

## May Not Attend Conference

Irish Free State Not Likely To Send Delegates

Dublin, Irish Free State.—Political circles outside the government looked with concern on statements by J. H. Thomas, British Dominions' Secretary, that abolition of the oath of allegiance to the British crown by the Free State would mean Great Britain could enter no more agreements with this country. "It looks like the end of the Ottawa conference as far as the Free State is concerned," they said.

## Preserve Historic Spot

Wellington, New Zealand.—Lord Bledisloe, Governor-General of New Zealand, and Lady Bledisloe, have purchased "Mitangi," the most historic spot in New Zealand and the place where the treaty establishing British sovereignty was signed in 1840, and will present it to the nation. The action prevents it falling into the hands of a citizen of the United States who had been making offers.

## New Fortunes In Making

Now is the Time to Buy Securities At Bargain Prices

It is told of Baron Rothschild that at the time of the French Revolution when the streets of Paris were running in blood he was quietly buying French Government bonds at ridiculously low figures. Mr. Rothschild bought these bonds, not because he knew they were very cheap if France were sound. He bought because he had faith in France. Five or six years ago many looked back and wondered why they did not have enough sense and courage to buy sound securities in 1921 at bargain prices. They said if they ever had a similar chance they would surely take advantage of it. They have such a chance now. One that has occurred only twice before in this century, in 1907, 1914 and 1921. Human nature always wishes to have a second chance. That second chance is now here. Why not take advantage of it?

One trouble on this continent, says an American, is that we have not the world viewpoint like the English people. What is more, few on this side of the water appreciate the tremendous strides made by the Old Country in the past six months. "Last Fall just before England went off the gold standard a man went to the Bank of England to get two gold sovereigns to play the minister at his approaching marriage, and was bluntly refused. Within the last few weeks the same bank has repaid in advance of maturity, £30,000,000 in gold to bankers in the United States. These contrasting figures—£10, in round numbers, and nearly \$150,000,000—are significant. Three years ago the public was blind to all dangers when securities sold at dizzy heights, unwarranted by earnings or prospects. The same public is utterly blind to current opportunities. Look at the eleven year chart. Was money made by buying in 1921 when business was temporarily bad, and the outlook black, or at peak prices eight years later, with a clear sky and industry at top speed? Then the public was speculation mad. Now it is mad for other and obvious reasons. Most people think like sheep. This is not the time for sheep, but for independent thinking. The patient is really better, but he does not know it; in fact, he has been looking so long on the dark side, he would hate to admit any improvement."

We certainly do not think of fostering any fresh speculative campaign, but on the other hand the present is the time for courage instead of fear; for work instead of for whining; for sane saving, sane spending and sane investing. New fortunes are in making. A few wise ones know it and are taking advantage of the situation. —Toronto Mail and Empire.

## New London Tower

Imposing Building Has Been Opened By Prime Minister

One of the most imposing new buildings in London has been opened by the Prime Minister, Ramsay MacDonald. It is the headquarters of the Abbey House Building Society, Abbey House, Baker Street, N.W., whose 150 ft. high square clock tower houses a fine peal of bells. Securities valued at more than £60,000,000 are housed in the strong rooms. In the sub-basement, garage accommodation connected by a hydraulic lift with the street is ready for the convenience of visitors.

## May Compel Closed Doors

Economists and business leaders of nations bordering the Pacific had been warned that high tariffs may compel many countries to close their doors to all foreign trade except raw materials. The warning was issued by K. Seko, representative of the Japan economic federation of Tokyo, at a joint convention of the National and Pacific Foreign Trade councils.

When an inscription was cut into the wall of an Egyptian temple, a scribe usually edited the "copy" and indicated changes in red ink.

Motorist: "I should think I was going at some speed. Even my shadow could not keep pace with me." —Pages Gales, Yverdon.

W. N. U. 1942

## NOTES ON GARDENING

Now Or Little Known Vegetables That Are Worth Considering

There are many new or little known vegetables which are worthy of more consideration in Canada. Many of them will be found to fill a special place such as providing salad material at a time when the ordinary garden is very deficient in this respect. Some of these include: *Cos Lettuce*, a lettuce that comes on during the hot season; *Spinach*, an early and satisfactory green vegetable which can be grown anywhere in Canada; *Asparagus*, easily grown, permanent and very early; *Cress*, one of the first salad materials; *Swiss Chard*, the stems of which are used as a substitute for asparagus from August on, and the leaves as spinach after the spinach season; *Endive*, a late lettuce substitute; *Kohl Rabi*, a cross between turnip and cabbage, of a very delicate variety; *Broccoli*, which furnish a change from the ordinary green bean, being shelled before cooking, and *Green Sprouting Broccoli*, resembling cauliflower in flavor and management, but being easier to grow. It is a good plan to go over the new seed catalogues each year and read the developments in this type of gardening and descriptions of some of the more uncommon vegetables. Build up your vegetable garden as you would your flower by adding one or two new things every year.

## Develop Lay-Out Gradually

Too often the man commencing gardening for the first time attempts to elaborate a scheme of decoration and when this does not turn out as well as was expected he becomes discouraged and gives up. The best policy is to draw up a very careful plan, based on some successful layout with which you are familiar, and then gradually develop that plan over a period of years. A complete supply of shrubbery, roses, creepers and perennials, in addition to the very necessary annuals, would mean a somewhat heavy expenditure of cash the first year and would also require more attention than the average man can afford. If the property is not new, much can be accomplished by incorporating the present planting into one's own plan. If it is new ground, make sure to take into consideration any permanent future improvement, such as the addition of a garage, fence or verandah. Paths should also be provided for. One of the first essentials will be the lawn and probably creepers for verandah or wall. One will also likely desire a fruit tree or two. We can buy a third of our perennials the first year, gradually adding to them as time goes on and we gain an experience.

For the person who wants a good show of annual flowers but who is not any too familiar with the different varieties, the following list is suggested for general satisfaction. *Calceolias*, *Linum*, *Scabiosa*, *Cosmos*, *Bachelor's Button*; the seed of these can be sown direct in the early spring; *Marigolds*, *Phlox*, *Zinnias*, *Snapdragons*; these can be planted direct as seed or small plants used. *Asters* and *Petunias* are best purchased as plants, or the seed may be sown early in hot beds or window flats.

## Should Pay Higher Salaries

Stronger Men Needed For The Re-organized Civil Service Commission

Members of the special civil service parliamentary committee are unanimous in their opinion that much higher salaries will have to be paid by the government to secure stronger men for the re-organized civil service commission.

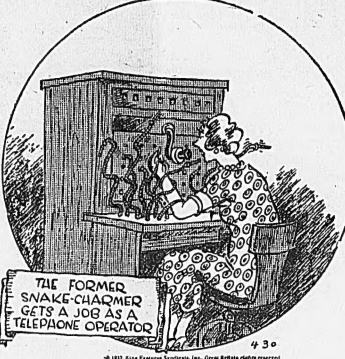

"I don't think the government is likely to get the right calibre of men for \$7,000 and \$8,000 per annum as at present," J. Earl Lawson (Cons., West York), committee chairman, said.

The commissioners in the past have held the rank of deputy ministers, but their remuneration has been much lower than the deputies who are paid from \$10,000 to \$12,000 per annum. For the new commission it is expected this marked disparity will be corrected.

**Increasing Buoyancy Of Logs**  
In its investigation of seasoning of logs as a means of preventing their loss through shrinkage, the Forest Products Laboratories of the Forest Service, Department of the Interior, Ottawa, found that seasoning birch logs under cover in a shed for ten weeks greatly improved their capacity for floating, but comparatively little increase in buoyancy was effected by prolonging the seasoning beyond that period.

With a few exceptions, every town of more than 50,000 people in Canada and Great Britain has a museum of some sort.

## FANCIFUL FABLES

## Developing Easy Route

Canadian Merchant Marine Might Be Used For Demonstration Purposes

Perhaps the most encouraging thing that the Government could do would be to instruct the Canadian Merchant Marine management to put on one of the boats at present laid up, on the route this summer and fall. The Star-Phoenix believes and with reason that import cargoes can and will come into the West this year if adequate ocean and insurance rates are available from Churchill for that reason.

The Government would not in all probability find itself greatly out of pocket if one ship of the merchant marine were put on this summer and fall equipped to carry grain in the holds, cattle between decks and package freight in the remainder of the space. As soon as adequate tramp competition was forthcoming the ship could be withdrawn unless, as is highly possible, it was found that it was profitable to maintain the service.

The point of putting on a ship from the merchant marine is that in this way the Government could quote its own insurance rates on cargoes, if not exactly the same as the St. Lawrence rates, at least within hailing distance of them, and thus afford to the underwriters the experience they say is necessary and at the same time make a gesture which we have no hesitation in saying will be hailed enthusiastically by the West. The statement has been made that the merchant marine has been instrumental in opening trade routes unprofitable at the start which were taken over subsequently by regular steamship lines. Why not apply the same argument to Churchill?—Saskatoon Star-Phoenix.

## Planning Silk Worm Culture

Farmers in the Fraser Valley and on Vancouver Island are reported to be undertaking the planting of mulberry seeds and cuttings this spring as a preliminary in silk worm culture, but the highly-decorative trees will also be useful for windbreaks.

Trouble is, in the United States, that they can't keep the underworld under.

The largest pit of the volcano Kilauea in Hawaii is almost a mile in diameter.

## Always On The Job

Old Man Luck Favors Some People Even In Hard Times

Even the hardest times cannot put Old Man Luck's nose entirely out of joint. People will go on picking up unconsidered trifles by the wayside. For instance, there's Brazil that has been in the dumps and doldrums and a few other such places for a long time, and nobody happy. But there's a fellow down there in the state of Matto Grosso who picks up a good-size pebble, just of a convenient size to chuck at a squirrel. He might have chucked it, but the same luck that caused him to pick it up perhaps inspired a thoughtfulness for animals, so instead of throwing the stone he slipped it into his pocket. Other lucky breaks followed, among these being the fact that the place where this condition arose is named Diamantina, showing that it is a district already identified with the diamond business. For the same reason, people thereabouts are likely to be diamond minded. The stone was tested and was found to be a diamond weighing 574 carats, one of the largest ever found in the world. It surpasses the largest from the Kimberley mines in Africa, the latter 442 carats, and the biggest De Beers product, 563 carats, and falls short only of the gigantic but irregular Cullinan stone, that weighed originally 3,024 carats.

## To Replace Bully-Beef

Scientific Food Tablet Will Sustain Soldier For A Day

The familiar bully-beef tin is about to make way for a scientific food tablet in the British soldier's pack. The new emergency ration is a four-inch block of concentrated sugar, cocoa powder, pea powder, beef powder, oil of lemon and cocoa butter. It will sustain a man for twenty-four hours. Besides the bully-beef tin, the food tablet will take the place of the biscuits, tea and sugar in the former "iron ration."

## Geodetic Survey Station Marks

The permanent marking of stations of the Geodetic Survey of Canada, Department of the Interior, is accomplished by inbedding bronze tablets in solid rock surfaces or in concrete piers. These piers are set in the earth well below the frost line and extend above ground approximately one foot.

## KING GEORGE GREETES THE CUP WINNERS

Nelson, the proud captain of Newcastle United, the English soccer team which defeated Arsenal to win the Football Association Cup at Wembley, can be seen introducing the team to His Majesty, the King before the game which thrilled 90,000 spectators.

## The Footpath Way

Side Paths On Rural Roads Necessary For Safety

Anyone who knows the English footpath is well aware why Britain fights to maintain its ancient heritage of glorious byways. For, in the old country, once a footpath, always a footpath. That is the law and lane protection societies fight to maintain the rights and privileges of established public rights-of-way—and Britain is fussy about trespass, too. Most Britons like to walk for the pleasure of walking. In their soft rural scenery and on time-honored paths, walking is also a British tradition worthy of being upheld, is an unforgettable recreation. Their footpath rights are well worth maintaining. Now that tearing speed fiends occupy the turnpikes and other smooth highways, the side paths are more important.

In that we fall short on this continent. None of the cost of good roads or highways allows anything for pedestrian rights. The rubberized monopolists demand and usually get the whole of the road. We do not encourage walking. Legs are becoming obese. Scenery is something which makes by the side windows. Speed is our fetish and we miss the true realization of the wonderful way and works of glorious nature. It is because we do not rise to demand of governments footpaths and recognition of the rights of pedestrians to life, liberty and the pursuit of rural happiness. The footpath way is also protection.

There are too few side walks on rural roads for those who appreciate hiking. Walking is worth while to encourage; it maketh the heart merry. One should have the right to walk in safety and comfort if one so desires. —Brandon Sun.

## The Successful Farmer

Requires Just As Thorough Training As For Any Other Business

An outstanding Canadian authority discussing farming as a vocation recently, included among the essential subjects in the educational preparation for farm work, the following: A thorough training in the use of English; proficiency in mathematics; sufficient commercial training so as to successfully carry on his business; practical training, obtained on the farm; a study of agricultural science including chemistry, physics, botany, entomology, bacteriology, and a thorough knowledge of the more practical subjects such as horticulture, field crops, livestock, mechanics; and a practical working knowledge of economics and civics. For the young woman whose future happiness will be found on the farm he suggested special training in cultural subjects and in the work of the home, such as cooking, sewing, management, and hygiene. Knowledge is as necessary to success in farming as it is in any other line of business.

## Light Conversation

An Englishman, an Irishman, and a Scotsman were arguing as to which of their respective countries had the lightest men.

The Irishman led the argument by saying: "We have men of Cork." "That may be," said the Scotsman, "but we have men of Ayr." "Well," said the Cockney, "that is very light, but we have Lightermen on the Thames."

Milan, Italy, will spend \$5,523,000 on public works within the next 12 months.

## The Health Fad

Many Rules For Exercise And Diet May Be All Wrong

The subject of how to live long is always of interest, which perhaps accounts for the eagerness of the average mortal to seize upon various methods which are recommended for promoting health and longevity, such as doing daily exercises to radio music and the like.

In spite of all the propaganda on the subject, however, there are many who are skeptical regarding the real benefits of strenuous physical activity. One of these wrote a letter to the press pointing out that Walter Camp, famed athlete and originator of the "daily dozen," died at 65, while he, the writer, had never taken any exercise to speak of and was still in excellent health, although a great-grandfather. He added that "the longest-lived people are the physically lazy but mentally alert."

Commenting on the letter, William Feathers, a well-known editor, declared that several years ago he adopted a vigorous health programme, including vegetarianism, cold baths and the daily dozen, with his result: "Acute indigestion led to the abandonment of vegetarianism on doctor's orders. Another doctor recommended discontinuance of cold baths. The doctor dozen are still pursued, but faith in them has been shaken by the untimely death of their inventor."

Still we may find many who swear by the health fads and feel that their lives have been saved thereby. As the proverb has it: "What is food for some is black poison for others." —Rosstown Eagle.

## How To Plant Trees

Special Bulletin Has Been Issued Dealing With This Subject

As a sequel to the taking over by the experimental farms branch of the Federal Department of Agriculture of the forestry experimental station in Saskatchewan, the publications branch has available for distribution in Manitoba, Saskatchewan and Alberta a supply of copies of a special bulletin—Forest Service No. 1—on the subject of tree planting on the prairies. This bulletin is one of the most interesting and practical text books on the subject to which it relates, and is certainly well worth the trouble of writing for a copy. Scatter beds of suitable trees and hedges are doing much to raise the standard and comfort of home-life on the bald prairie areas. For success in growing trees or hedges under prairie conditions one must know what to plant, when to plant it, how to plant it, and how to get it. These points are all dealt with fully in the bulletin referred to.

## Cutworms Again Active

Increase Of Two New Species In Alberta Reported

Every indication points to serious crop damage by cutworms this year, according to Dr. E. L. Seaman, Dominion Government entomologist. Pale western cutworms, which caused heavy crop loss last year in southern Alberta, are hatching again, he states.

Dr. Seaman said there was also another menace in the increase of two other cutworm species, the army cutworm and the early cutworm. The rain and snow storm that swept southern Alberta some weeks ago, he said, failed to eradicate the threat. If rain was plentiful this year the loss, he thought, might be small.

## A Scotch Tip

"Here's a tip for you, lad," said the Scottish member as he entered the clubhouse after a round of golf. "Thank you, sir," said the caddy expectantly.

"Go home at once. You big cloud means rain."

Tommy: "Isn't 'wholesome' a funny word, father?"

Father: "What's so funny about it?"

Tommy: "Why, take away the 'whole' and you've got 'some' left."

"What are you doing?"

"Looking for the kite I lost."

"That was three weeks ago."

"Yes, but the apples were not ripe then."—Buen Humor, Madrid.

"What are you doing?"  
"Looking for the kite I lost."  
"That was three weeks ago."  
"Yes, but the apples were not ripe then."—Buen Humor, Madrid.

## Eno keeps you Clean Inwardly

It's far more important to clean the inside than the outside of a milk bottle. For the same reason, clean intestines are far more important than clean face and hands. Nothing will cleanse your intestines better than ENO'S "Fruit Salt." Take it regularly, morning or night. Be ENO conscious!

**ENO'S  
FRUIT SALT**

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET PEDLER

Author of  
"The Splendid Folly," "The Hermit  
Of Far Down," "The House of  
Hodder & Stoughton, Ltd., London.

CHAPTER XXI.—Continued.

"Beg pardon, my lady," he said, touching his hat, "Sir Adrian sent me to say that he's waiting for you in the car just along the road there." He pointed to where, on the white ribbon of road which crossed the Moor not far from the base of the tor, a stationary car was visible.

Claire, her face ashen, turned to Nick in mute appeal.

"Sir Adrian? I thought he left for London this morning?"

Nick shot the question fiercely at the chauffeur, but the man's face remained respectfully blank.

"No, sir, Sir Adrian drove as far as Exeter and then returned. Afterwards we drove on here, sir, and they told us in the village we should find you at Shelton Tors."

Meanwhile the other members of the party were becoming aware that some extraordinary had occurred. Claire's white, stricken face was evidence enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspecting bad news of some kind.

"What has happened?" Recognizing the Charwood liveries, she turned to the chauffeur and continued quickly: "Has Sir Adrian met with an accident?" She could conceive of no other cause for the man's unexpected appearance.

"No, my lady, Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car?" repeated Jean and Lady Anne in chorus.

"The little group of friends drew closer together.

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—a trick! He never meant to go to London at all. He only pretended, to let me think that I was free and he could trap me." She looked at Nick and Jean significantly. "He must have

## Too Much ACID

MANY people, two hours after the eating, suffer indigestion—as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50¢ a bottle—any drug store.

The ideal identifier for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

W. N. U. 1942

overheard us—that day in the shrubbery at Charwood—you remember? They both nodded. "And then planned to humiliate me in front of half the county."

"But you won't go back with him?" exclaimed Nick hotly. He swung round and addressed the chauffeur sternly. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it is possible for a well-dressed servant's face to express the human emotion of compassion, his did so.

"It would be no good, sir," he said in a low voice. "He means her ladyship to come. 'Go and fetch her away, Langton,' was his actual words to me. I didn't want the job, sir, as you may guess."

"Well, she's not coming, that's all," declared Nick fiercely. "It's only done to insult her—to humiliate her!"

Claire smiled a little wistfully. "I ought to be used to that by now," she said a trifle shakily. "But Lady Anne is right—I must go."

She turned to the chauffeur, dismissing him with a little air of dignity that, in the circumstances, was not without its flavor of heroism. "You can go on ahead, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved off obediently.

"Nick and I will walk down to the car with you," said Lady Anne. She was fully alive to the fact that her escort might contribute towards restoring the kind of reception Claire would obtain from her husband.

"Jean dear, look after everybody for me for a few minutes, will you? And," raising her voice a little, "explain that Claire has been called home suddenly, as Sir Adrian was not well enough to make the journey to town after all."

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of comparatively little use. Although to many of them Claire was personally an entire stranger—since Sir Adrian intervened whenever possible to prevent her from forming new friendships—the story of her unhappy married life was practically public property in the neighborhood, and it was quite evident that to all intents and purposes the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent in the middle of a jolly party.

It was impossible to stem the flood of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus outraged.

The remainder of the afternoon was spoilt for her, and Nick's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her heart.

"I'm so sorry, Nick," she whispered compassionately, when presently the opportunity of a few words alone with him occurred.

He glared at her.

"Are you?" he said shortly. "I'm not. I think I'm glad. This ends it. No woman can be expected to put up with public humiliation of that sort."

"Nick!" There was a sharp note of fear in Jean's voice. "Nick, what do you mean? What are you going to do?"

There was an ugly expression on the handsome boy's-looking face. "You'll know soon enough," was all he vouchsafed. And swung away from her.

Jean felt troubled. She had never seen Nick before with that set, still look on his face—a kind of bitter

concentration which reminded her forcibly of his brother—and she rather dreaded what it might portend.

Her thoughts were still occupied with the afternoon's unpleasant episode, and with the possible consequences which might accrue, as she climbed into Burke's high dog-cart.

She had had a fleeting notion of claiming Claire's vacant seat for the homeward run, but had dismissed it since actually Claire's absence merely served to provide comfortable room for Blaise in the Willow Ferry car, which had held its full complement of passengers on the outward journey. Moreover, she reflected that any change of plan, now that she had agreed to drive back with Burke, might only lead to trouble. He was not in a mood to brook being thwarted.

A big, raking chestnut, on wires to be off, danced between the shafts of the dog-cart, irritably pawing the ground and jerking her handsome, satin-skinned head up and down with a restless jingle of bit and curb-chain. She showed considerably more of the white of a wicked-looking eye than was altogether reassuring as she fought impatiently against the compulsion of the steady hand which gripped the reins and kept her, against her will, at a standstill.

The instant she felt Jean's light foot on the step her excitement rose to fever heat. Surely this must mean that at last a start was imminent and that that firm, masterful pressure on the bit would be released!

But Burke had leaned forward to touch the light dust-rug round Jean's knees, and regarding this further delay as beyond bearing the chestnut created a diversion by going striding up in the air and pirouetting gaily on her hind legs.

"Steady now!" Burke's calm tones fell rebukingly on the quivering, sensitive ears, and down came two shining hoofs in response, as the mare condescended to resume a more normal pose. The next moment she was off at a swinging trot, breaking every now and again, out of pure exuberance of spirits, into a canter, sternly repressed by those dominating hands whose quiet mastery seemed conveyed along the reins as an electric current is carried by a wire.

"You needn't be afraid," remarked Burke. "She'll settle down in a few minutes. It's only a 'stable ahead' feeling she's suffering from. There's not an ounce of vice in her composition."

"I'm not afraid," replied Jean composedly.

(To Be Continued.)

## Arguments Against Bay Route

Montreal Man Has Faith In Northern Seaway As Potential Great Outlet

"Most of us older men remember the struggle for recognition of the St. Lawrence route when all the present arguments against the Hudson Bay route were put forward against the St. Lawrence," declared Thomas Hartling, veteran Montreal ship agent, in defending the Hudson Bay route as a potential grain carrier.

"All these objections were overcome in time, and the St. Lawrence is now an accepted fact. Furthermore, it is not many years ago that Vancouver was thought an impossible outlet for Canadian grain. It was said that it could not be carried through the tropics via the Panama Canal. This route is now established and is unquestionably of the greatest advantage to the Alberta farmers," Mr. Hartling continued.

"Would it not be better for all those interested in the grain trade of Canada to try and help, rather than hinder, this new route, which, when it becomes established, as in time I firmly believe it will, can be of the very great benefit to all grain growers in the northern sections of the prairie provinces?" It is his opinion, despite its comparatively short season of navigation, that the Hudson Bay route will carry a very considerable trade both eastbound and westbound, and will result in a great saving in transportation costs to the large area of country directly tributary to it, he said.

Mr. Hartling added the owners of the "Farnworth" and "Warkworth," which opened the route as grain carriers last year, were entirely satisfied with their experiences and were ready to send these steamers again or other tonnage required during the coming season. They were willing to accept rates not exceeding those paid last season, he said.

Hubby—"You never have any affection for me, you've never liked calling me 'dear' as other men's wives do."

Wife—"Do other men's wives call you dear?"

Mexico's only surplus crop carried over into 1932 was sugar.

## Best oil cheapest in home, says factory sup't.

"The last thing we'd try to economize on," says the superintendent of a large eastern factory, "is lubricating oil. By using cheap oil we could save hundreds of dollars each year—but it would cost us thousands of dollars for repairs, replacements and lessened efficiency of equipment."

The same is true in the home. If all housewives knew what factory men know about lubrication, few of them would use anything but 3-In-One Oil for their expensive sewing machines, vacuum cleaners, electric fans, lawn mowers, washers, and other household devices. 3-In-One, a blend of mineral, vegetable and animal oils, is the best oil for household use, for its cleans and protects as well as lubricates.

Ask for the old reliable 3-In-One Oil at good drug, grocery, hardware, department and general stores. For your protection, look for the trade mark "3-In-One" printed in Red on every package.

## No Combatant Ships Cruising On Atlantic

Something That Was Never Known Before World War

No combatant ships of the United States remain on the Atlantic Coast—something never known before the World War. The theory that the United States must adhere to the policy of distributing units of the fleet to protect industrial Eastern States is still recognized in navy plans, but except Great Britain there is now not sea power on the other side of the Atlantic that could afford to challenge our naval strength.

Great Britain is so sure of the good-will of this country that her warships on duty in the West Indies and at Halifax are mere patrol boats. One of them was ordered to St. John's, Nfld., the other day when strict rioting threatened.

At the present time the United States fleet is in the Pacific, the battlefleets, and their auxiliaries in home waters, and a squadron in the Far East. There they are likely to pass the summer. Not a single combatant ship flies her flag in the Atlantic, although the principal yards and bases are on this coast, and strategic Guantanamo, with Culebra, east of Porto Rico, may be said to have only caretakers.—New York Times.

## Clings To Old Customs

People In Siam Keep Up Habits Of Ancestors

Shaving the heads of men and boys in Siam, is a religious rite, and is performed in the temple by priests. Although the Siamese have an up-to-date king, Prajadhipok and numerous western ways are being introduced into their governmental life, they remain at heart typically oriental and cling to the ancient customs of their ancestors. White elephants march in their sacred processions, maidens dance in the temples as they have been doing for centuries, the king is carried in a palanquin, and, save for the occasional buzzing of an airplane, the visitor to Siam could easily forget that he is living in the 20th century.

## Made An Impression

Kid Act Earned Certain Amount Of Notoriety For Traveller

The traveller, arriving late at his destination, had to be content with cold chicken for his evening meal. With his stomach protesting, he stepped outside the window, eyeing the remainder of the chicken hungrily, so he passed it through to him. A year later the traveller called at the same hotel for another meal, and was recognized by a waitress. She sought out the manager, and pointing to the visitor, said excitedly: "There he is, sir! That's the man who ate the chicken—bones and all!"

## Larger Greenhouse Area

Glass used in the greenhouses and hotbeds on Vancouver Island and the Lower Mainland, British Columbia, covers an area of approximately four million square feet, an increase of over 200 per cent. in the past eight years.

A compact device for humidifying homes and apartments in winter has been produced.

## How Air Films Are Made

Handicaps Have Been Overcome By Use Of Motor Driven Cameras

Film stars of aviation present more handicaps during production than almost any other type of screen fare, according to Stephen Roberts. Mr. Roberts is the wartime aviator and former stunt flier who went to Hollywood to direct "Sky Bride."

"The one reason airplane movement fails to furnish thrills and interest is because of the plane's lack of background," he said on his return. "In playing action against a blank, even a clouded sky, it is difficult to convey a sense of speed."

"With the cameras on the ground, the airplanes usually are so distant that the speed is lost on the screen. With the cameras in a balloon or on a high tower, the range of the activity is limited. With the cameras in another 'plane, both camera-ship and the 'plane being photographed must travel at relatively the same speed to allow filming of close shots, and once more all sense of speed is lost."

"Electrically controlled cameras are the way we succeed in capturing effective scenes in the air. We attach these motor-driven cameras to the rim of the cockpit, pointing backward, right into the flier's face."

"We rehearse the scenes on the ground, then send the boys up alone. When the right attitude is reached, the actors press a switch and the camera starts grinding while the actor plays the scene himself, without direction."

## Little Helps For This Week

"Bear ye one another's burdens, and so fulfil the law of Christ."—Galatians vi. 2.

What is the real good? I asked in musing mood. Order, said the law-court; Knowledge, said the school; Truth, said the wise man; Pleasure said the fool; Love, said the maiden; Beauty, said the page; Freedom, said the dreamer; Home, said the sage; Fame, said the soldier; Equity, said the seer. Spoke my heart full sadly. "The answer is not here," I said within my dream. Softly this I heard: "Each heart holds the secret, Kindness is the word."

John Boyle O'Reilly. But now God has so ordained it we should learn to bear one another's burdens, for there is no one who has not some defect, no one without some burden, no one independent of others, no one wise enough of himself; but we ought to bear with one another, comfort one another, help, instruct, and advise one another. —Thomas A. Kempis.

For Scalds Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from rheumatism and neuralgia. A bottle in the house and stable saves many a doctor's and veterinary's fee.

## Canada's Arctic Citizens

Over 7,000 Eskimos Living In Our Northern Hinterland

There are approximately 7,100 Eskimos in Arctic and sub-Arctic Canada, including Hudson Bay, scattered in small groups, principally in the Arctic Islands and along the northern sea-board. Canadian Eskimos are progressive. The more advanced have, in their homes, sewing machines, gramophones and radio sets. In the Mackenzie delta and along the western Arctic coast the ambition of the head of a family is to own a schooner fitted with an auxiliary gasoline engine. At Aklavik during the summer as many as twenty-five of these schooners, all owned by natives, are frequently to be seen at one time.

As a verminicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

## Origin Of The Sandwich

It seems that the spirit of the age is against tea. "I wouldn't dream of taking up a cup and saucer with all the paraphernalia of a tea table," says a very modern hostess: "We usually play bridge and a stop for tea would be a nuisance." So we are back again at the days when Mr. Sandwich, too busy with gambling to bother about lunch, invented the snack which bears his name.

Hawaii has a new biscuit and bread plant which cost half a million dollars.

The Chinese government has placed an order for freight cars in Scotland.

## Nervous Indigestion

Troubled For Years, Mrs. John Machon Thanks Dr. Williams' Pink Pills for Permanent Relief

Soon Saw A Great Change

"For many years I had been troubled with indigestion and my nerves," writes Mrs. John Machon, Calumet, Que. "I suffered constantly. I tried many remedies, but without gaining any relief. I was unable to get any rest. I got a box of Dr. Williams' Pink Pills to give them a trial. I soon saw a great change. Now I can go to bed and have a good night's rest, and am able to do a day's work with any one. All I have to thank for it is Dr. Williams' Pink Pills. I would not be without them in the house."

Dr. Williams' Pink Pills are remarkably effective in cases like the above, because they create new rich blood, which supplies the tissues, the very elements they need. Equally effective for all run-down and anemic conditions. Try them. At your druggist's, 50¢ a package.

## To Bring Back Prosperity

Only Way Is By Harder Work and Better Work

If we allow ourselves to believe that some intangible, mysterious thing called "recovery" is going to improve our lot without any assistance from ourselves we will soon lose the trenches we have gained. The last three years have chastened the instinct for laziness which is one of our racial disadvantages. The last three years has driven the well-dressed idler into work or closer to it. The last three years has forced us to place sport and recreation generally in their proper relation to the stubborn realities of life. We cannot afford to abandon the stern discipline we have learned. Harder work and better work is the only way to reach the promised land of prosperity. By the sweat of our brow alone will good times come again.—Daily Express, London, England.

## Showed Great Vitality

Remarkable vitality was shown by a hen that was buried under a heap of garden and path cleanings at Palmerston North, New Zealand, for twenty-four days. A neighbor heard it cackling and found it after investigation. It was weak and emaciated, but made a good recovery.

There was a one-way street in Pompeii, the Italian city which was destroyed by the eruption of Mount Vesuvius in 79 A.D.

## DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusters—acts as a polish—is receiving a hearty welcome from Canadian women who detect dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a special treatment, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

## Special Offer

Wonder Paper is made by the makers of the famous PARASOL heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you don't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25¢ for which please send me one full-size package of W O N D E R P A P E R and your 100 recipes for "Leftovers."

## The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

## Good Advertising

Mr. and Mrs. H. W. Johnston, of Calgary, while touring from east to west had dinner at Alask and while there asked where was the best hotel to stop at on the line between Calgary and Saskatoon and was informed the Chinook hotel, Chinook. After arriving here they informed proprietor, Capt. Peters, that they had stayed at the old Acadia hotel a year ago and both Mr. and Mrs. Johnston were amazingly surprised at the extensive improvements which had taken place, and stated that rooms such as the Chinook hotel can boast of would cost from \$3 to \$5 in any large city. They reported a splendid stay here and promised to boost Chinook and the Chinook hotel.

## Cereal Sets Sports Day Date, Providing

There was a meeting of the baseball fans in J. A. Waterhouse's store Thursday evening with a good crowd in attendance. It was decided to have a ball team for 1932 as usual. M. J. Himey was elected president, E. Ready secretary, and George McArthur manager and captain. A committee was appointed to choose a date for a ball tournament and sports day that would not interfere with our neighboring towns. Wednesday, June 15, was favored by all, and this date will be chosen if there are no conflicting events to the east or west of us.—Cereal Recorder.

Sunday, May 22, will be observed as Empire Day in the Chinook United Church. Service will commence 7.30 p.m. Come and pay respect to the King and to the King of Kings.

## For Sale or Trade

McLaughlin Buick D-45 Touring Car, good running order, will trade for horses and cattle.

A. J. Mumford,  
Chinook, Alberta.

Capt. Peters paid Oyen a call on Wednesday.

Chinook's first tourists of the season arrived Wednesday and have pitched their tents on the west side of the town.

## Heard Around Town

Mr. G. Cook was a Cereal visitor last Thursday.

Born-To-Mr. and Mrs. O. D. Harrington, May 12, a daughter. Miss K. Pfeifer, who has been on the sick list for the past few days, is rapidly regaining her health and strength.

Mrs. M. O'Callaghan, who spent the winter months at Lacombe, has purchased the H. D. Connor farms.

Mrs. M. O'Callaghan left Wednesday for Holy Cross Hospital, Calgary, where she will undergo a serious operation.

The Chinook orchestra has been engaged to play at the dance which will wind up Youngstown's 24th of May celebration.

A hamper of groceries is to be given away free at the "hard times" dance to be held in the Chinook hotel ballroom next Saturday evening.

The secretary, Miss M. Otto, of Chinook and District School Pairs Association has received a donation of \$15.00 to be applied on the prize money from the council of the R. M. of Sounding Creek.

Misses Helen Lensgraf and May Petersen, who have been spending a few days' vacation with friends and relatives at Drumheller, returned home Tuesday accompanied by Mr. and Mrs. Klaus Hohen.

Mrs. Clarence Petersen was hostess on Tuesday evening to the ladies' card club. Mrs. Nelson held the highest score of the play, the prize being a pretty oval tray. Mrs. Thompson won the consolation, a pretty photo frame.

Chinook and Cereal opened the baseball season on the latter's diamond Wednesday afternoon. The score, 7, 7, showed a pretty tight game. Yesterday the Cereal boys played the return game on the Chinook diamond, the result being Cereal 4, Chinook 1.

Gus Cook, of the Chinook hotel staff, was carrying around a badly swollen face the latter part of last week. It looked as if Gus had run up against a horse's nest and had come out second best. Well, toothache is not one of the pleasures (?) of life to be laughed at any time.

The Ladies' Aid met last Wednesday at the home of Mrs. Chapman. Mrs. Rennie being joint hostess with Mrs. Chapman. In the absence of the president, Mrs. W. S. Lee, the chair was ably filled by the vice president, Mrs. Lloyd Robinson. There was not a very large turn-out of members.

A steady rainfall here Saturday totalled almost an inch. Seeding of wheat is now about 85 percent completed, and the land is in splendid condition. Early sown wheat is showing three to four inches above ground. Pasture is growing rapidly and there will soon be an abundance of grass. Prospects are best in years.

The illustrated lecture, "Lost at Sea," given in the ballroom of the Chinook hotel Friday evening last was well attended and thoroughly enjoyed and appreciated. A much larger turn out would have undoubtedly been present except for two reasons, inclemency of the weather, but the main one was the change of the date from June 3 to May 13.

Although the rain kept the farmers from attending yet it was a blessing and everybody is happy looking forward to a bumper crop this fall. A large number of those present were from Lanfie, Youngstown and Cereal.

## Retain Beer Parlors

(Hanna Herald)

Are the beer parlors of Alberta hotels dens of vice and sinks of iniquity and should they be done away with as an evil and unnecessary thing and the sale of beer placed in the hands of the government? This is a matter which the people of Alberta will be asked to vote on within the next year or two. The Prohibition League wants the beer parlors done away with and have requested a provincial plebiscite on the question. The provincial government postponed the holding of the vote on the grounds of the need of economy. But eventually a vote will be held.

The Herald believes the beer parlors should not be eliminated. Our principal reason for taking the attitude is that an individual is permitted to purchase a drink of beer cheaply whenever he so desires.

Most beer parlors are decently operated, the country hotels need the revenue from this source in order to operate respectable hostilities and, even with it, these hotels operate on a very narrow margin of profit. Take away their beer licenses and you ruin seventy-five percent of the hotels of the province. The ones in the towns and villages suffer the most and these are the places which badly need reasonably good hotel accommodation.

If the present day beer parlors were one-tenth as bad as the bar of the older days, the Herald would not support them for a minute. But they are infinitely preferable to the so-called "prohibition act" which was in force in this province some ten years ago and which was a joke and a crime-breeder if there ever was one.

Journey throughout the towns and villages of Southern Alberta and you will find most of them have a very good hotel. Most of the hotelkeepers try to run their beer parlors rigidly in accordance with the law. Those that don't are the ones that furnish ammunition against beer parlors, and we think that every conscientious hotelkeeper should make it a point to see that the small fraction who disregard the law are punished severely. Personally, we would regret to see the towns and villages have to put up with the class of hotel accommodation which the abolishing of the beer parlors would bring.

## Farmer Get Skinned in This Rawhide Deal

A cowhide big enough to make six pairs of shoes, brought a Georgia farmer the magnificent sum of 37 cents. It weighed 42 pounds and sold for two cents a pound, a total of 48 cents, in Savannah. Express charges from the farmer's home point were 47 cents. This left 37 cents for him. He figured that he had made a profit if he neglected such trifling items as hauling the hide three and a half miles, providing a box for it and shipping it.

This looks, says "Labor" like a match for John A. Simpson's story of the seven sheep which W. B. Estes, a farmer of Littleton, Colo., sold for \$3.30, out of which he had to pay commission and other charges of \$2.55, leaving him a check for 75 cents for the seven sheep.

"But my dear lady, you should not allow your grief to overcome you. Remember your husband is far happier in the other world." "M-maybe he is, but I think you are extremely rude to say so."

## Co-operation and Support

By what may be termed an unwritten agreement, the business and professional men of a town are partners with the publisher of the local paper in the work of giving the community a creditable newspaper. It may be assumed that the newspaper in any town started business because the business men of the town wanted one.

Though merchants and publishers in a town may come and go, as the years pass, their relationship as partners in the promotion of things for the good of the community endures. The home paper gives in its columns a reliable picture of the vitality of the business of the town and of the enterprise—or lack of it—of its chief citizens, through the presence or the absence of the news from the town's business places, which is known as advertising.

We may of course be considered immodest in assuming that the newspaper is still regarded, by others than the publisher, as something that helps the town and the community. Just in case someone should about to decide that we are arguing that storekeepers ought to advertise for the benefit of the newspaper, we hasten to give assurance that it is very much otherwise. Our argument is that they ought to advertise for the benefit of, first, themselves; then the town, and then the community. Through the local newspaper they may inform the people as to the services they are prepared to render.

We maintain that a newspaper is of much usefulness and value to a community, and if it does not come quite up to the standard expected, it is quite within the power of the business men to have it become so. A newsy local publication undoubtedly enhances the value of the interest of local business men. Whether or not the storekeepers use their newspaper for the broadcasting of their store news throughout the district their business is better because of the publication of a paper in their town. The local newspaper is a very real link between the town and the people of the community for many miles around, and the truth of this has

been discovered too late in a number of towns in which suspension of the newspaper has become necessary because of lack of support.

Did you ever consider what your local newspaper does for the several communities in its field, and with very little remuneration? It prints the news of your churches, schools and other organizations, week after week. It gives reports of doings in the local communities—which the city daily does not cover, and boosts 'this, that and the other' for the welfare of the community. It does many things, and we are confident that our efforts have at least been appreciated by the majority. But there is a financial side to be looked after. Therefore we want your co-operation and support for the following reason:—

1 We wish to continue this "public service" on a paying basis for all concerned.  
2 We are endeavoring to keep "business as usual" and at the same time be of some benefit in this district, believing that a local newspaper is a very useful institution in a community.

## Burning Iceberg

Wonders never cease, and this time it happened on Chinook Main street Sunday morning last outside of the Chinook hotel.

Mr. Mielke happened to notice something white underneath Mr. Mumford's car that looked like snow and called his attention to it. Upon examination they found that gasoline which had been leaking out pretty fast had frozen to a solid mass of ice. Immediately Mumford started his car and took it to the Service Garage where he found he had sustained a loss of six gallons of gas.

After the car had left for the garage Capt. Peters picked up the newly formed iceberg and placed it on the sidewalk, then L. S. Dawson took out his cigar lighter and lit it to see if the iceberg would burn. Instantly the flame shot up and there was the iceberg burning on the sidewalk of Chinook until it all disappeared.

—Contributed by an eye witness.  
[Boys should not play with fire, it is a dangerous practice.]

## Motor Truck Delivery

Prompt Service, Prices Reasonable  
M. L. CHAPMAN, Chinook

## A WEEK IN FAIRYLAND

Nobody ever entirely loses that childhood illusion of a land which surpasses in loveliness, surprises and happiness anything that the mind is capable of envisaging; the land of make-believe, which everyone hopes may someday become a reality. It is not too much to say that the glorious Rockies, Canada's great holiday territory, renowned throughout the world, are as close to this elusive dreamland as anything that mortal man is likely to discover. Special arrangements for the coming season now bring a week in this modern fairyland well within the reach of the average traveller, with Banff and Lake Louise, on the main line of the Canadian Pacific Railway, as base-points and a wide range of every varying scenery and cozy bungalow camps beyond. The "ab-and-a-half days' tour" has already become a slogan among those planning their summer vacation, enticing, as it does, not only the two famous hotels at Banff and Lake Louise, but such well known points of interest and beauty as Johnston Canyon; Moraine Lake and the immortal Valley of the Ten Peaks; the Lakes in the Clouds; the Plain of the Six Glaciers; the Great Divide; Wapta Lake Bungalow

Camp; Yoho Valley and Bungalow Camp; Takakaw Falls; the historic Kicking Horse; Mount Stephen; Emerald Lake and the wonders of the great mountains near Field, B.C. Easily reached from all points by Canadian Pacific Railway, main line points are linked with the camps in the inner mountains by the Dinosaur Transport Company, past masters in comfort and conveyance for the traveller in the valleys and passes of the mighty Rockies. Automobile drives, trail rides and hikes combine with bright entertainment in the evenings to make the holiday something to be remembered for a lifetime.
